MILA International, Inc. is an innovative company that develops veterinary medical products otherwise commercially unavailable. We appreciate the opportunity to serve the world's diverse veterinary community since 1991.

Accessories & Components	102-103	Controlled Flushing Set	75, 96, 101	Feeding Tubes	
Administration Sets	94-97	Conversion Charts	105	BE Tubes	60-61
Airway/ET Tube Exchange Catheter	77	Custom Order Information	4	E Tubes	56-58
Airway Sampling	74-75	Cystostomy Catheter	41	G Tubes	51
Anal Sac Balloon Catheter	46	Cytobrush	75, 93	J Tubes	51
Antimicrobial Catheters	11	Diffusion/Wound Catheter	81	NG Tubes	52-54
Arterial Catheter	16	Dispensing Pins	30-31	PEG Tubes	50
Arthroscopy Fluid Line	94	Distributors	106-107	Fenestrated Catheters	19
Aspiration Needle System	33	Drain Adapters		Fenestrated Centesis Catheters	67
Atomizer/Throat Sprayer	78	for Chest Tubes	64-66, 68-69	Fetcher™ Endoscopic Retrieval Device	93
Auto 3-way	68-69, 103	for Surgical Drains	73	Filters	
Autotransfusion	99	Drains	72	for Bacteria	81, 102
Bacteria Filter	81, 102	Drapes	13, 89	for Blood	98-99
Balloon Dilation Feeding Tube	60-61	Drum Long Line Catheter	14	Fluid Collection and Delivery	94-97
Barbed Adapters	49, 102	Echogenic Needles	71, 87	Fluid Control Dial	29, 96
Bellows Suction System	73	Economy Catheters	48	Fluid Transfer	90, 96
Biopsy Products	32-33	Elastomeric Pump	89, 100	Foley Catheters	38-39
Blake Drains	45, 72	Embryo Transfer	90	Foley Catheters for Female Canine	41
Blood Administration Sets	98	Endo Pouch	93	Gastrostomy (PEG) Kits	50
Blood Filtration	98-99	Endoscopic Catheters	92-93	Gastrostomy Catheters	51, 58
Bloat Tubes	46	Endotracheal Tubes	76-79	GDV/Bloat Tubes	46
Bone Marrow Aspiration Needles	33	Enteral Feeding Products	50-61	Grenades (for use with drains)	73
Brain Biopsy	32	Epidural Pain Management Kits	81	Guardian™ Disc	17, 45, 59, 73
Bronchoalveolar Lavage (BAL)		Equine Joint Infusion Kit	100	Guidewires	11, 103
Small Animal	74	Equine Nasogastric Tubes	55	Guidewire Catheters	
Large Animal	75, 101	Esophageal Balloon Dilation	60-61	Central Venous	9-11
Bubble Tubing	66	Esophageal Feeding Tube Passer	57	Chest Tube	62
Canine GDV/Bloat Tubes	46	Esophagostomy Feeding Tubes		Cystostomy	41
Caps	25, 27, 102	Balloon Dilation	60-61	Gastrostomy	50, 58
Centesis Adapters	68-69	Polyurethane	56	Hemodialysis	17, 44
Cerebral Biopsy	32	Silicone	58	Urinary	41
Chest Tubes		Esophagostomy Tunneler	57	Guttural Pouch Catheter Kit	92
Guidewire Insertion	62	Extended Use MILACATH™	18	Heimlich Valves	64
Silicone	63	Extension Sets		Hemodialysis Catheter Kits	17, 44
Trocar	63	2, 3 and 4 Port Sets - all bores	28	Infusion Pumps	
Chest Tube Adapters		Special Use Sets	29	Clear Cuff Pressure Infusor	97
for Suction Systems	66	Straight Sets - Mini/Small Bore	24	Elastomeric Pump	89, 100
with Auto 3-way	68/69	Straight Sets - Large Bore	25	Injection Ports and Caps	21
with Stopcock	64	T Sets - Mini/Small Bore	26	Intraosseous Access	15
Chest Tube Suction Bulbs	65	T Sets - Large Bore	27	Introcan Safety® Peripheral IV	20
Christmas Trees	49, 102	Eye Lavage Kit	88	Introducer Sheath w/Hemostatic Valve	16
Closed Medication System	82-83	EZ-IO® Intraosseous Access	15	IV Sets	94-97
Connectors	49, 102	Fecal Management System	47, 85	Jackson Pratt Drains	72
Continuing Education Information	4	Feeding Tube Extension Set	53	Jejunal (J - G) Tubes	51

Joint Infusion System	100	Product Support Information	4
Lacrimal Lavage Needles	87, 89	Pumps	89, 100
Lance-a-Lot	92	QuickyCath™	19

Ordering Information

Placing an Order

1. Website: www.milaint.com
Phone: +1-859-957-1722
Toll Free: 888-645-2468
Email: customerservice@milaint.com
2. Order directly from MILA on our website, by phone or email. Most orders placed directly with MILA will ship same day.
OR
3. Order through an authorized distributor listed on pages 106-107.
4. Credit cards accepted.

Returns

1. Notification must be given before return.
2. Full credit will be allowed for the following conditions:
 - A. Merchandise shipped in error against a purchase order. MILA must be notified within 10 days of receipt.
 - B. Merchandise damaged in transit. MILA must be notified within 10 days of receipt.
3. When unopened merchandise is authorized to be returned for any reason other than above, credit will be:
 - 80% within 60 days of receipt
 - No credit beyond 60 days of receipt

Scan the QR code to initiate a return request.

Custom Orders

Have a custom need? Separately packaged sterile components? A custom kit for your hospital? There are reasonable minimum order requirements. Scan the QR code to access the request form.

New Products

Large Animal Endotracheal Tubes

Page 78-79

The MILA Cuffed Silicone Endotracheal Tubes are appropriate for both oral and nasal intubation, as clinically decided. The inflated balloon cuff facilitates pressurized assisted ventilation.

MILA Guardian™

Page 59

The MILA Guardian™ is a chlorhexidine-impregnated protective foam disc that is clinically proven to reduce the risk of catheter-related infections. Ideal for drains, esophagostomy tubes and hemodialysis catheters.

LARGE ANIMAL Bronchoalveolar Lavage (BAL)

Page 75

Open-end, silicone, radiopaque, heavy wall tube for lavage via the nasotracheal route.

NEW SIZE!

24Fr x 200cm (79in)

Fecal Management System

Page 47

The Fecal Management System consists of a soft, silicone catheter inserted into the rectum for collection of liquid stool and a bag to keep the odor and stool contained in a closed system.

NEW SIZE!

28Fr catheter

Small Bore Straight Extension Set

Page 24

NEW SIZE!

20Ga x 152cm (60in) extension set with female luer and rotating male luer lock.

ENFit™ Nasogastric Feeding Tubes

Page 54

Luer specially designed to accept only ENFit™ connections. Reduces the risk of tubing misconnections.

VetJet™ Nasal Intranasal Mucosal Atomization Device

Page 34

Designed to be a safe and painless way to deliver medication via the naris. Ideal for delivering midazolam intranasally for seizures in dogs.

NOW HAS AN AMBER SYRINGE FOR LIGHT SENSITIVE MEDICATIONS!

Long Term Polyurethane Catheter Kits

INDICATIONS:

The Long Term MILACATH™ is indicated for venous administration of drugs or fluids, blood sampling, TPN and central venous blood pressure monitoring. The catheter is non-kinking and non-thrombogenic.

RECOMMENDED INDWELL TIME: Up to 30 days.

SELECT FROM THE FEATURES BELOW TO DETERMINE WHICH KIT IS NEEDED ON PAGES 8-13:

- 1) Insertion Technique - Guidewire Introduction or Peel-Away Introduction.
- 2) Animal Size - Large Animal/Equine or Small Animal/ Dogs and Cats.
- 3) Number of Lumens and Length - Single, Double, Triple or Quadruple Lumens at various lengths.
- 4) Catheter Type - Standard or Antimicrobial.
- 5) Preferred Extensions - Integrated Extension Lines or Separate Extension Lines.

See pages 8-13 for a list of pieces included in the kits.

Single Lumen Catheters - Available with integrated or separate extension tubes. The 14Ga catheters have a side and distal exit port.

Multi-Lumen Catheters - Each lumen has separate exit points spaced along the length of the catheter.

GUIDEWIRE INTRODUCTION of a Long Term MILACATH®

1 INTRODUCER: Use the provided catheter-over-needle to cannulate the vein. Confirm placement in the vein by a flashback of blood into the stylet hub. Remove the needle.

2 GUIDEWIRE: Using the thumb notch, retract the curved "J" tip. Place the tip of the guidewire introducer into the catheter hub and feed the guidewire slowly using the thumb notch.

****ALWAYS HOLD ON TO THE GUIDEWIRE****

3 TISSUE DILATOR: Keeping the guidewire stable, remove the introducer catheter. Feed the dilator onto the guidewire. Pinch the skin proximal to the insertion site to create a skin tent and use firm pressure to introduce the dilator. Use the provided scalpel to make a small skin nick if needed. Do not feed the dilator and guidewire as one unit.

4 CATHETER: Keeping the guidewire stable with your non-dominant hand, remove the dilator. Feed the catheter onto the wire, paying close attention to the wire as it exits the distal port. **DO NOT INSERT THE CATHETER IF THE WIRE HAS NOT EXITED THE OTHER END. **ALWAYS HOLD ON TO THE GUIDEWIRE. ****

5 Remove the guidewire. Secure the catheter in place with the included suture. Sutures through the wing eyelets should be pulled toward the insertion site. If the final indwelling depth is not at the catheter hub, use the included suture wing and blue clamp to secure the extended external length in place at the insertion site.

Guidewire Introduction

PEEL-AWAY INTRODUCTION of a Long Term MILACATH®

1 PEEL-AWAY INTRODUCER: Cannulate the vein holding the stylet and peel-away sheath together with the handles flat against the skin. Confirm placement in the vein by a flashback of blood into the hub. Remove the stylet while stabilizing the introducer sheath.

2 CATHETER: Feed the catheter into the introducer sheath to the required depth.

3 Hold catheter hub or extension set against the animal. Grasp the blue handles with both hands and snap away from the hub to break them apart. Gently pull the introducer sheath out of the insertion site ~0.5cm at a time. Pull the handles away from each other to tear the sheath apart. Take care to avoid splitting the peel-away directly at the insertion site.

4 Once the peel-away has been completely split and removed, push the remainder of the catheter to the required depth.

5 Secure the catheter in place with the included suture. Sutures through the wing eyelets should be pulled toward the insertion site. If the final indwelling depth is not at the catheter hub, use the included suture wing and blue clamp to secure the extended external length in place at the insertion site.

Peel-Away Introduction

Long Term MILACATH® – Small Animal Kits using GUIDEWIRE INTRODUCTION

SMALL ANIMAL KITS include the following:

Suture Clamp(s)

Suture Wing(s)

Guidewire inside Coiled Housing

Dilator(s)

Catheter-over-Needle Introducer(s)

Size 11 Scalpel

Catheter

3-0 Nylon Suture with Curved Needle

Integrated Extension Line(s) with clamp(s)

3-0 Nylon Suture with Straight Needle

Needle-Free Stasis Valves(s)

Stemless Cap(s)

Gauze

3-0 Nylon Sutures
Straight and Curved Needle

Long Term MILACATH® – Small Animal Kits using GUIDEWIRE INTRODUCTION

Recommended indwell
time up to 30 days.

Single Lumen with Integrated Extension Line

DESCRIPTION		ITEM #

16Ga (5Fr) x 9cm (3.5in)	with 18Ga catheter introducer	SA1609
16Ga (5Fr) x 15cm (6in)	with 18Ga catheter introducer	SA1615
16Ga (5Fr) x 20cm (8in)	with 18Ga catheter introducer	SA1620
16Ga (5Fr) x 30cm (12in)	with 18Ga catheter introducer	SA1630
14Ga (6Fr) x 6.5cm (2.6in)	with 16Ga catheter introducer	SA1406
14Ga (6Fr) x 15cm (6in)	with 16Ga catheter introducer	SA1415
14Ga (6Fr) x 20cm (8in)	with 16Ga catheter introducer	SA1420

Double Lumen with Integrated Extension Lines

4Fr x 8cm (3.25in)	with two 22Ga lumens, 20Ga catheter introducer	SA4FD08
4Fr x 13cm (5.25in)	with two 22Ga lumens, 20Ga catheter introducer	SA4FD13
4Fr x 30cm (12in)	with two 22Ga lumens, 20Ga catheter introducer	SA4FD30
5Fr x 8cm (3.25in)	with one 18Ga & one 20Ga lumen, 20Ga catheter introducer	SA5FD08
5Fr x 13cm (5.25in)	with one 18Ga & one 20Ga lumen, 20Ga catheter introducer	SA5FD13
5Fr x 25cm (10in)	with one 18Ga & one 20Ga lumen, 20Ga catheter introducer	SA5FD25
7Fr x 15cm (6in)	with one 14Ga & one 18Ga lumen, 18Ga catheter introducer	SA7FD15
7Fr x 20cm (8in)	with one 14Ga & one 18Ga lumen, 18Ga catheter introducer	SA7FD20
7Fr x 30cm (12in)	with one 14Ga & one 18Ga lumen, 18Ga catheter introducer	SA7FD30
7Fr x 60cm (24in)	with two 16Ga lumens, 18Ga catheter introducer	SA7FD60

Triple Lumen with Integrated Extension Lines

5.5Fr x 8cm (3.25in)	with one 20Ga & two 22Ga lumens, 20Ga catheter introducer	SA5FT08
5.5Fr x 13cm (5.25in)	with one 20Ga & two 22Ga lumens, 20Ga catheter introducer	SA5FT13
5.5Fr x 30cm (12in)	with one 20Ga & two 22Ga lumens, 20Ga catheter introducer	SA5FT30
7Fr x 15cm (6in)	with one 16Ga & two 18Ga lumens, 18Ga catheter introducer	SA7FT15
7Fr x 20cm (8in)	with one 16Ga & two 18Ga lumens, 18Ga catheter introducer	SA7FT20
7Fr x 30cm (12in)	with one 16Ga & two 18Ga lumens, 18Ga catheter introducer	SA7FT30
7Fr x 60cm (24in)	with one 16Ga & two 18Ga lumens, 18Ga catheter introducer	SA7FT60

Quadruple Lumen with Integrated Extension Lines

8.5Fr x 20cm (8in)	with one 16Ga, one 14Ga & two 18Ga lumens, 18Ga catheter introducer	SA8FQ20
--------------------	---	---------

Long Term MILACATH® – Large Animal Kits using GUIDEWIRE INTRODUCTION

LARGE ANIMAL KITS include the following:

Suture Wing(s)

Suture Clamp(s)

Guidewire inside Coiled Housing

Dilator(s)

Catheter-over-Needle Introducer(s)
Size 15 Scalpel

Catheter

Needle Introducer*

Extension Line(s)
(Integrated** or Separate)

2-0 Polypropylene Suture with
Curved Needle

2-0 Polypropylene Suture with
Straight Needle

Needle-Free Stasis Valves(s)

Stemless Cap(s)

Gauze

2-0 Polypropylene Sutures
Straight and Curved Needle

Tethered cap (#8090) included in LA1615-2P, LA1620-2P, LA1415-2P, LA1420-2P instead of a stasis valve and stemless cap.

* Refer to description for kits that contain a needle introducer.

** Integrated extension lines include clamps.

Long Term MILACATH® – Large Animal Kits using GUIDEWIRE INTRODUCTION

Recommended indwell
time up to 30 days.

Single Lumen with Integrated Extension Line - Antimicrobial

Antimicrobial catheters feature silver zirconium phosphate throughout the catheter body to inhibit bacteria growth without the risk of bacterial resistance.

DESCRIPTION	ITEM #
16Ga (5Fr) x 11cm (4.5in) with one 18Ga & 16Ga catheter introducer, one 16Ga needle introducer	FOALS LA1611-A
16Ga (5Fr) x 15cm (6in) with one 18Ga & 16Ga catheter introducer, one 16Ga needle introducer	FOALS LA1615-A
16Ga (5Fr) x 20cm (8in) with one 16Ga catheter introducer & one 16Ga needle introducer	LA1620-A
14Ga (6Fr) x 20cm (8in) with one 14Ga catheter introducer & one 14Ga needle introducer	LA1420-A

Single Lumen with Integrated Extension Line

16Ga (5Fr) x 15cm (6in) with one 18Ga & 16Ga catheter introducer, one 16Ga needle introducer	FOALS LA1615
16Ga (5Fr) x 20cm (8in) with one 16Ga catheter introducer & one 16Ga needle introducer	LA1620
14Ga (6Fr) x 15cm (6in) with one 14Ga catheter introducer & one 14Ga needle introducer	LA1415
14Ga (6Fr) x 20cm (8in) with one 14Ga catheter introducer & one 14Ga needle introducer	LA1420
12Ga (8Fr) x 20cm (8in) with one 14Ga catheter introducer & one 14Ga needle introducer	LA1220

BOVINE KIT INCLUDES: CATHETER, INTRODUCER, GUIDEWIRE, DILATOR, SUTURE WINGS WITH CLAMPS, STASIS VALVE AND CAP

12Ga (8Fr) x 20cm (8in) with one 14Ga needle introducer	BOVINE B1220

FOALS

Pick & Peel Surgical Drape

Use for maintaining a sterile field for catheter placement. Each drape allows the user to select a 3.75cm (1.5in) or 6.9cm (2.75in) fenestration. Drape size 60cm x 60cm (24in x 24in).

- Adhesive apertures.
- Sterile, impervious, translucent film.
- Provides superb translucent protection from fluids with optimal drapeability.
- Great for keeping patients clean and dry during DENTAL PROCEDURES. Simply put the snout through the fenestration.

ITEM # PPD
ITEM # PPD10 (10 Pack)

Better Value

Peel-Away Introducers

Facilitate the placement of catheters with these high quality introducers. They peel apart cleanly after introduction. Used in MILA long term catheter kits and PICC kits.

DESCRIPTION	ITEM #
3Fr (20Ga) x 3.75cm (1.5in)	4203
4Fr (18Ga) x 3.75cm (1.5in)	4204
5Fr (16Ga) x 3.75cm (1.5in)	4205.5
5Fr (16Ga) x 6.25cm (2.5in)	4205
6Fr (14Ga) x 3.75cm (1.5in)	4206.5
6Fr (14Ga) x 6.25cm (2.5in)	4206

Drum Long Line Catheter

Catheter-through-Catheter Introduction Style

Recommended indwell
time up to 30 days.

- Recommended for administration of vesicant drugs (hypertonic solutions, chemotherapeutics, vasopressors, etc.)
- The drum houses the long catheter and is an advancement system designed to minimize the risk of touch contamination.
- Introduction technique: Long catheter through introducer catheter.
- The INTRODUCER CATHETER REMAINS INDWELLING and the long catheter hub screws onto the introducer catheter hub. Since the introducer catheter remains indwelling, the long catheter can be easily replaced through the same introducer, avoiding another needle stick.
- Long catheter material is radiopaque, kink-resistant polyurethane.
- Kit includes catheter-over-needle introducer, a long catheter with stiffening wire, drum and gauze.

IDEAL FOR:

1. Administration of vasopressor (e.g., norepinephrine) when a central line is not feasible.
2. High-concentrated dextrose administration to crashing hypoglycemic patient.
3. Serial blood draws.
4. Blood glucose curves.

DESCRIPTION	ITEM #
22Ga x 20cm (8in) with 20Ga Introducer	LLD2220
20Ga x 20cm (8in) with 18Ga Introducer	LLD2020
19Ga x 25cm (10in) with 16Ga Introducer	LLD1925

Pick & Peel Drape recommended for sterile field, see page 13.

1 Insert introducer catheter into vessel. Remove needle.

2 Insert tip of drum into catheter hub.

3 Rotate wheel clockwise to advance the long catheter until resistance is met OR the long black mark appears.

4 Gently pop open the drum.

5 Further advance the long catheter manually and luer lock the two hubs together.

6 Remove stiffening stylet from long catheter.

7 Confirm placement by aspiration of blood, then attach a stasis valve or extension set and flush.

8 Place gauze underneath catheter hub to absorb pressure from the hub.

Long Line Catheters

Catheter-through-Catheter Introduction Style

- Long term radiopaque catheter for venous access.
- Kink-resistant polyurethane catheter can be cut to desired length.
- Female luer lock is placed onto long catheter after insertion into vessel, after the introducer catheter has been removed.
- Moveable wing provides method of secure attachment.
- Kit includes catheter, introducer, moveable suture wing (not available in LL2425), and female luer lock adapter.

DESCRIPTION	ITEM #
24Ga catheter adjustable up to 25cm (10in)	LL2425
20Ga catheter adjustable up to 45cm (18in)	LL2045
19Ga catheter adjustable up to 45cm (18in)	LL1945
19Ga catheter adjustable up to 90cm (36in)	LL1990

Pick & Peel Drape recommended for sterile field, see page 13.

EZ-IO®

Intraosseous Catheter Kit

- Emergency delivery of fluid, medications and blood products directly into the vascular system within seconds via intramedullary vasculature.
- Reusable stainless steel two-part needle consists of:
 1. Outer cannula with depth marks and forked tip
 2. Solid, non-coring, sharp inner cannula
- No bone splintering as with competitive systems.
- Training needles are a non-sterile, economical option. Sterilize with cold sterilant, autoclave or EO gas.
- Power driver has lithium sealed battery.

DESCRIPTION	ITEM #
Power Driver - G3	EZPD-3
Needle - 15Ga x 1.5cm	EZ1515
Needle - 15Ga x 2.5cm	EZ1525
Needle - 15Ga x 4.5cm	EZ1545
Training Needle - 15Ga x 1.5cm	EZTN15
Training Needle - 15Ga x 2.5cm	EZTN25
Training Needle - 15Ga x 4.5cm	EZTN45
Carrying Case - Soft Sided	EZC-S

Pick & Peel Drape recommended for sterile field, see page 13.

PICC - Silicone Catheter Kit

Catheter-through-Peel-Away Introducer

- PICC - Peripherally Inserted Central Catheter.
- Silicone material for long term use of 30+ days.
- Radiopaque catheter can be cut to desired length.
- Insertion method via peel-away introducer.
- Catheter has a stylet wire to facilitate advancement.
- Kit includes catheter with wire stylet, peel-away introducer and tape measure.

DESCRIPTION	ITEM #
1.9Fr (23Ga) x 40cm (16in) Single Lumen	3240
3Fr (20Ga) x 60cm (24in) Single Lumen	3360
4Fr (18Ga) x 60cm (24in) Single Lumen	3460
5Fr (16Ga) x 60cm (24in) Single Lumen	3560
5Fr x 60cm (24in) Double Lumen (2-18Ga)	3565

Pick & Peel Drape recommended for sterile field, see page 13.

"We have found the EZIO very useful for patient care in our Emergency and Critical Care Department. It is easy to use and we train our students, staff, house officers and faculty on clinical indications."

Steven L. Marks BVSc, MS, MRCVS, DACVIM
Clinical Professor of Internal and Emergency Medicine
North Carolina State University

Manual Bone Marrow Needle

Length Adjustable

- Triple sharpened tip to allow a non-traumatic, fast penetration into the bone marrow cavity.
- Adjustable depth guard to help control depth during needle insertion.
- Luer lock connection for syringe.

DESCRIPTION	ITEM #
18Ga x 2cm (.78in) - Pink	BMAN18
15Ga x 3cm (1.25in) - Blue	BMAN15

Veincath Catheters

Catheter-through-Needle Introduction Style

- Innovative replacement for the Venocath.[™]
- 20Ga x 30cm (12in) catheter with 18Ga introducer
- Protective pouch to aseptically advance catheter with stylet.
- After catheter is placed, the needle is safely discarded before easy attachment of the female luer.
- Radiopaque.
- Economical.

ITEM #	V2030
--------	-------

Pick & Peel Drape recommended for sterile field, see page 13.

Introducer Sheaths with Hemostasis Valve

- Vascular access introducer sheath with hemostasis valve.
- Complete hemostasis during insertion and withdrawal of devices.
- Quarter-turn-screw dilator locking system ensures the smooth transition from dilator to sheath and stabilizes the dilator.
- Includes sheath, dilator, and 45cm hydrophilic coated nitinol wire with angled tip.

DESCRIPTION	ITEM #
4Fr x 4cm (1.6in) - .021 wire	ISK4
5Fr x 5cm (2in) - .021 wire	ISK5
6Fr x 7cm (2.8in) - .035 wire	ISK6
7Fr x 7cm (2.8in) - .035 wire	ISK7
8Fr x 7cm (2.8in) - .035 wire	ISK8
9Fr x 7cm (2.8in) - .035 wire	ISK9

Pick & Peel Drape recommended for sterile field, see page 13.

Arterial Catheter

- Reliable guidewire introduction technique.
- 22Ga x 6cm (2.5in)
- Constructed of Teflon with flexible suture wing.
- Set includes 22Ga needle, wire and catheter.

ITEM #	AR2206
--------	--------

Pick & Peel Drape recommended for sterile field, see page 13.

Hemodialysis Catheter Kit

NEW

MILA Guardian™

Chlorhexidine-Impregnated Protective Foam Disc

Ideal for Drains,
Esophagostomy Tubes and
Hemodialysis Catheters

CLINICALLY PROVEN TO REDUCE THE RISK OF CATHETER-RELATED INFECTIONS

- Chlorhexidine dressing with 360° of skin antiseptis protects the entire insertion site of percutaneous devices.
- Designed to reduce risk of infection by absorbing exudate and inhibiting or killing bacteria.
- 1 inch (2.54cm) diameter with 7mm center opening and radial slit for easy placement.
- Each disc provides **7 DAYS** of protection.

ITEM #	DR7
--------	-----

- Two D-shaped lumens for optimal, high blood flow rates.
- Soft polyurethane catheter designed to minimize catheter kinking.
- Flexible tip design for ease of placement and to minimize risk of vascular trauma.
- Silicone extension lines for improved durability during repeated clamping.
- Staggered exit ports designed to reduce recirculation.
- Moveable clamp allows for anchorage at the incision site, regardless of catheter indwell length.
- Rotating suture wing.
- Kit includes a double lumen polyurethane catheter with silicone extension lines, guidewire, dilator, drape, scalpel, introducer, suture, suture wing, male caps and gauze.

DESCRIPTION	ITEM #
7Fr x 16cm (6.3in)	HDL716
8Fr x 16cm (6.3in)	HDL816
12Fr x 16cm (6.3in)	HDL1216
12Fr x 25cm (10in)	HDL1225

Hemodialysis Catheter Kit

Unique blend of thicker walls combined with a double D cross section for maximum flow rates with significant resistance to kinking.

Extended Use MILACATH[®]
Catheter-over-Needle Introduction Style

Recommended indwell
time up to 30 days.

- Kink and break resistant polyurethane catheter-over-needle.
- Radiopaque.
- Can be left indwelling up to 30 days.
- Integrated suture wing with suture groove.

DESCRIPTION	ITEM #
20Ga x 6.25cm (2.5in)	2011
18Ga x 6.25cm (2.5in)	1811
16Ga x 7.5cm (3.0in)	1603

12Ga x 13cm (5.25in)	1212F*

Kinder to the patient.
Save time and money.

Peripheral IV Catheters

- Smooth transition from needle to catheter reduces burring and wasted sticks.
- Superior needle sharpness reduces tissue trauma and pain, making it kinder to the patient.
- Clear, large volume CLOSED chamber allows for immediate indication of vessel entry.
- Radiopaque Teflon material
- Filter vent plug prevents blood loss during insertion and can also be used to temporarily cap the IV catheter prior to securing an extension set.
- Sold individually or in boxes of 50

DESCRIPTION	ITEM #
26Ga x 20mm (0.75in)	IV2619
24Ga x 20mm (0.75in)	IV2419
22Ga x 25mm (1in)	IV2225
20Ga x 25mm (1in)	IV2025

18Ga x 30mm (1.25in)	IV1832
18Ga x 48mm (1.88in)	IV1848

Filter vent plug included on all catheters.

Introcan Safety® Peripheral IV Catheters

- Quality smooth transition from needle to catheter reduces burring and wasted sticks.
- Introcan Safety® radiopaque polyurethane catheters feature a safety clip that automatically covers the needle point when it is withdrawn, reducing accidental needle sticks.
- Push-off tab on hub for smooth insertion.
- Closed flashback chamber.
- Sold individually or in boxes of 50.

DESCRIPTION	ITEM #
24Ga x 19mm (.75in)	IC2475
22Ga x 25mm (1.0in)	IC2201
20Ga x 32mm (1.25in)	IC2001
18Ga x 45mm (1.75in)	IC1801

Safety clip automatically deploys when needle is retracted.

Injection Ports/Stasis Valve

FEATURE	Item #8200*	Item #8098	Item #8095	Item #8080
<p>The 8200 stasis valve is recommended for ALL APPLICATIONS to reduce confusion about which style to use.</p> 				
Needle-Free	✓	✓	✓	
Swabable	✓	✓		
Neutral Displacement	✓			
Clear	✓	✓	✓	
Bi-Directional	✓	✓	✓	
Approved for Saline Flush	✓	✓		
High Flow	✓		✓	
Normally Closed	✓	✓	✓	✓

- #8200 - Stasis Valve (Neutral Displacement Injection Port) is a needle-free connector that prevents blood reflux into the catheter, reducing the risk of occlusion and eliminating the need to clamp the line when not in use. The saline flush option reduces risk, cost and time associated with heparin use (heparin not required). Allows for higher flow rate than the MicroClave®.
- #8098 - MicroClave® is a normally closed, needle-free connector. Labeled for saline flush (heparin not required).
- #8095 - Normally closed valve is needle-free for direct attachment of an IV line or syringe. Includes a tethered cap (Item #8090).
- #8080 - Safety Injection Port has a built-in stop to prevent accidental needle sticks.

DESCRIPTION	ITEM #
Stasis Valve (Neutral Displacement Injection Port)	8200
MicroClave® Needle-Free Injection Port	8098
Normally Closed Valve (includes 8090)	8095
Safety Injection Port	8080

Caps

- Tethered Cap (Item #8090) attaches to the catheter or extension hub to cover the injection port. Not for stasis valves or MicroClaves® because it has a stem that keeps the valve open.
- Stemless Luer Lock Cap (Item #8099) 10 pack, non-sterile. Keeps injection ports clean without opening the valve. Works with all injection ports, including stasis valves.

DESCRIPTION	ITEM #
Tethered Cap	8090
Stemless Luer Lock Cap (10 pack)	8099

Needle-Free Connectors

THINK SWABABLE

Stasis Valve (Neutral Displacement Injection Port)

- Helps to maintain catheter patency by preventing blood reflux and associated clotting at the catheter tip when a syringe or line is disconnected.
- Clear, closed, NEEDLE-FREE valve with a swabable top for easy disinfecting.
- NO CLAMPING REQUIRED to control valve -induced reflux.
- HEPARIN NOT REQUIRED. Saline flush option reduces risk, cost and time associated with heparin use.
- Use in place of a three-way stopcock on chest tubes.

accepts BOTH luer lock and luer slip;
DOES NOT permit needles.

Luer

Transparent housing
allows for visualization of residue
after medication and flush.

- ✓ Reduce catheter associated infections
- ✓ Reduce catheter occlusions
- ✓ Reduce dependency on sharps
- ✓ Reduce cost

Flat access port with slit septum
is an easy to clean, smooth, swabable
surface that serves as an infection control
barrier.

Silicone valve
absorbs and compensates for the
pressure changes inside the catheter
when connecting or disconnecting
from a luer, preventing the reflux of
blood into the catheter.

Straight internal fluid pathway
minimizes reflux and priming volume
with low dead space. Also allows for
successful blood removal when flushing.

Stasis valve is included on many extension sets (listed below) and can also be purchased separately (Item #8200 on page 21).
Cap with 8099 on page 21.

Item numbers that include this feature: 8518M, 8530M, 8550M, 8570M, 8572M, 8573M, 8574M, 8575M, 8576M, 8577M, 8584M, 8585M, 8587M, 8590M and 8590MS.

Normally Closed Valve

- Luer activated valve is needle-free and bi-directional for infusion and sampling.
- Cap with 8090 or 8099. See page 21.

Normally Closed Valve can
also be purchased separately
(Item #8095 on page 21).

Item numbers that include this
feature: 8518, 8570, 8572, 8575,
8585, 8590 and 8590S.

MicroClave®

- Clear, closed needle-free port
- Approved for saline flush. Heparin not required.

MicroClave® can also
be purchased separately
(Item #8098 on page 21).

Item numbers that include
this feature: MC40, MC43
and MC44.

Male Connections

360° Spinner Luer Lock*

- 360° spinning luer lock hub resists twisting and kinking of the catheter during patient movement.
- Helps prevent catheter disconnects by allowing the extension line to spin freely 360° when connected to a catheter. Avoids accidental unscrewing.
- Allows extension set to attach to catheter in any position while leaving the suture wings flat against the patient.

Item numbers that include this feature: 8518M, 8530M, 8550M, 8585M, 8587M, 8590S, 8590MS, 8700 and 8718.

Rotating Male Luer Lock

- Twisting collar secures the male luer into the female luer without having to turn the entire extension tube, therefore permitting positioning of the tubing section.

Item numbers that include this feature: 175480, 2408, 8515, 8518, 8540, 8541, 8545, 8560, 8570, 8570M, 8572, 8572M, 8574M, 8575, 8575M, 8577M, 8584M, 8585, 8590, 8590M, 8671, FTE60, MC40, MC43, MC44, UVB10 and UVB60.

Tethered Cap

- Tethered cap included on all extension sets with stasis valve to keep the stasis valve clean and free of debris when not in use.

Item numbers that include this feature: 8518M, 8530M, 8550M, 8570M, 8572M, 8573M, 8574M, 8575M, 8576M, 8577M, 8584M, 8585M, 8587M, 8590M and 8590MS.

Needle Injection Ports

Injection Port with Male Luer Slip

- Rubber septum for use with needles for injection.
- Luer slip fits standard female luer .

Item numbers that include this feature: 8573M and 8576M.

Injection Port with Male Luer Lock

- Rubber septum for use with needles for injection.
- Luer lock has a twisting collar that locks the luer in place.

Item numbers that include this feature: 8545, 8570, 8570M, 8572, 8572M, 8575, 8575M, 8577M and MC40.

8584M

Trifuse Extension Set with 3 Stasis Valves, 3 Tethered Caps
3 Clamps, Rotating Male Luer Lock
16Ga x 10cm (4in),
Priming Volume = 0.18ml per lumen

8584M

8587M

Quadfuse Extension Set with 4 Stasis Valves,
4 Tethered Caps, 4 Clamps, 360° Spinner
16Ga x 15cm (6in),
Priming Volume = 0.25ml per lumen

8587M

Large Bore - 12 Gauge

8550M

DESCRIPTION

ITEM #

Bifuse Y Extension Set with 2 Stasis Valves,
2 Tethered Caps, 2 Clamps, 360° Spinner
12Ga x 15cm (6in),
Priming Volume = 0.9ml

8550M

Special Use Extension Sets

Pressure Monitoring Extension Set

DESCRIPTION	ITEM #
Small Bore Pressure Monitoring Extension Straight Set with Female Luer and Rotating Male Luer Lock. 16Ga x 180cm (72in), Priming Volume = 3.3ml	8515

Blood Pressure Monitoring

8515

UV Blocking Extension Sets

DESCRIPTION	ITEM #
Mini Bore UV Blocking Extension Set with Female Luer, Clamp, Rotating Male Luer Lock 23Ga x 25cm (10in), Priming Volume = 0.2ml 23Ga x 152cm (60in), Priming Volume = 0.65ml	UVB10 UVB60
1000ml UV Blocking Medication Bag Covers (10 pack)	UVB-B

Light Sensitive Medications

UVB60

Item #UVB-B
Bag Cover

Connect to IV catheter for intravenous administration.

Connect to NG tube for enteral administration.

Extension Set with Three-Way Stopcock

DESCRIPTION	ITEM #
Large Bore Straight Extension Set with Three-way Stopcock and Rotating Male Luer Lock. 13Ga x 20cm (7.9in), Priming Volume = 1.8ml	2408

Three-Way Stopcock

2408

Feeding Tube Extension Set

DESCRIPTION	ITEM #
Large Bore Feeding Tube Extension Set with Rotating Male Luer Lock, Clamp and Female Luer. Color coded purple for feeding. 13Ga x 152cm (60in), Priming Volume = 9.4ml	FTE60

Enteral Feeding

FTE60

Extension Set with Fluid Control Dial

DESCRIPTION	ITEM #
Easily adjust infusion rate from 10ml/hour up to 350ml/hour when used with a gravity system. When used with a pressurized system, flow is four times faster. Length is 45cm (18in), Priming Volume = 3.0ml	175480

Adjust Infusion Rate

175480

Dispensing Pins

Locking Vial Spike with Microclave and Vent

- BEST PRACTICE – Preserve integrity and sterility of medication in vial because aspirated room air is filtered.
- Save time and money.
- Puncture vial only once for multiple withdrawals or injections.
- NEEDLE-FREE, Swabable
- Operate with any luer syringe.
- Clamps onto the vial, eliminates pulling against a vacuum because aspirated medicine is replaced in the vial by filtered air.

DESCRIPTION	ITEM #
Clamping Vial Spike with Needle-Free Valve and Filtered Inlet Vent	PIN1

Vial Spike with Microclave

- BEST PRACTICE – Preserve integrity and sterility of medication in vial.
- Save time and money.
- Puncture vial only once for multiple withdrawals or injections.
- NEEDLE-FREE, Swabable
- Operate with any luer syringe.

DESCRIPTION	ITEM #
Vial Spike with Needle-Free Valve	PIN2

IV Bag Access with Microclave

- BEST PRACTICE – Preserve integrity and sterility of medication in bag.
- Save time and money.
- Spike the bag only once for multiple withdrawals or additives.
- NEEDLE-FREE, Swabable
- Operate with any luer syringe.
- **Greatly speeds up the process of filling syringes from a bag. The bag is punctured only once with the spike, thereby extending the life of the fluids when withdrawing from the bag through the needle-free adapter, rather than through a needle.**

DESCRIPTION	ITEM #
IV Bag Access with Needle-Free Valve	PIN3

All NEEDLE-FREE
and SWABABLE

Vial Adapters

- 99.99% protection against aerosols and vapors
- Low residual
- Multi-use with drip-free connector
- NEEDLE-FREE, Swabable.
- Operate with any luer syringe.
- Vented with dual pathway non-coring plastic spike and pressure equalization with 0.2 micron one way filter

DESCRIPTION	ITEM #
13mm vial , Priming Volume = 0.10ml	PIN13
20mm vial , Priming Volume = 0.10ml	PIN20
28mm vial , Priming Volume = 0.10ml	PIN28

Use circles above to help determine which size vial adapter is needed.

Vial Adapters for ONCOLOGY

- Functions as a pressure equalization device, utilizing a sealed expansion chamber that establishes and maintains neutral pressure when air or diluent is injected into or aspirated from the vial.
- Connects to 13mm and 20mm vials. Permanently locks on to the vial to prevent disconnection and reduces exposure.
- Use any luer lock syringe to access the vial. No need to prime syringe with non-filtered air.
- Drip free connection
- NEEDLE-FREE, Swabable

DESCRIPTION	ITEM #
13mm vial , Priming Volume = 0.10ml	12-009
20mm vial , Priming Volume = 0.10ml	12-010

Additional oncology products on pages 82-84.

Shores-Little **Cerebral** Biopsy Device

Designed to obtain quality biopsies from deep or superficial cerebral structures.

- Includes biopsy sleeve, stylet, extension set and 5cc syringe.
- Placement is guided by intraoperative ultrasound imaging or direct visualization of the target tissue.
- Sterile, single use

DESCRIPTION	ITEM #
16Fr x 10.5cm (4.1in)	SLCBD1

Andy Shores, DVM, MS, PhD; DACVIM(Neurology)
Clinical Professor and Chief, Neurosurgery/Neurology
Mississippi State University College of Veterinary Medicine
and Veterinary Specialty Center

Echogenic Soft Tissue Biopsy Needle

- Echogenic tip for precise placement under ultrasound guidance.
- Centimeter markings facilitate precise depth placement.
- Specimen depth notch is *adjustable* to 15mm or 22mm.
- Can be safely positioned in the lesion before the spring-loaded cutting cannula is deployed.
- Spring-activated, single-hand operation for soft tissue core biopsy collection.
- Precision cutting helps preserve cellular architecture for more accurate diagnosis.

DESCRIPTION	ITEM #
16Ga x 8cm (3in)	BN1608
16Ga x 15cm (6in)	BN1615
14Ga x 8cm (3in)	BN1408
14Ga x 15cm (6in)	BN1415

Aspiration Needle System for FLUID

Designed to provide **INTRAOSSEROUS ACCESS** and obtain quality **FLUID ASPIRATES**.

- Triple sharpened tip to allow a non-traumatic, fast penetration into the intramedullary cavity.
- Adjustable guard to help control depth during needle insertion.
- Luer lock connection for syringe

DESCRIPTION	ITEM #
18Ga x 2cm (.78in) - Pink	BMAN18
15Ga x 3cm (1.25in) - Blue	BMAN15

Length Adjustable

BMAN18

BMAN15

Bone Marrow Aspiration Needle System for SOLIDS

Designed to provide quality biopsies by capturing and retaining the bone marrow in the needle **WITHOUT ALTERING THE SAMPLE**.

- System includes Jamshidi style biopsy needle, obturator pushing rod, probe guide and luer lock cap.
- Needle point allows for easy penetration into the intramedullary cavity.
- Marked obturator rod indicates length of specimen prior to extraction and can be used to expel specimen from the extraction cannula.
- Luer lock connection for syringe

DESCRIPTION	ITEM #
13Ga x 10cm (4in) - Blue	BMAN13
11Ga x 10cm (4in) - White	BMAN11
8Ga x 10cm (4in) - Green	BMAN8

VetJet™ Nasal Intranasal Mucosal Atomization Device

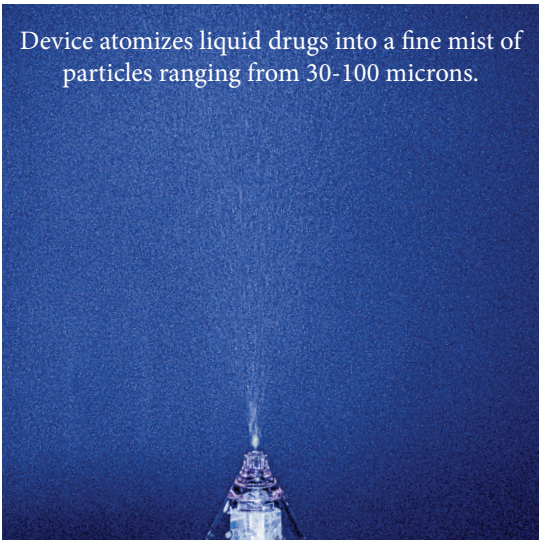

- Designed to be a safe and painless way to deliver medication via the naris.
- Ideal for delivering midazolam intranasally for seizures in dogs.
- Device atomizes liquid drugs into a fine mist of particles ranging from 30-100 microns.
- Conical profile is designed to seal within the patient's naris.
- Hospital kit (Item #5400) includes the VetJet™ Nasal Atomizer and 3cc amber syringe.
- Home kit (Item #5400K) includes the VetJet™ Nasal Atomizer, 3cc amber syringe and dispensing pin with .2 micron air filter to attach to medication vial.

Ideal for delivering midazolam intranasally for seizures.

DESCRIPTION

DESCRIPTION		ITEM #
VetJet™ Nasal Sprayer and 3cc amber syringe	HOSPITAL USE	5400
VetJet™ Nasal Sprayer, 3cc amber syringe and dispensing pin with air filter	HOME USE	5400K

VetJet™ Instructions for Use:

1 Remove protective cap from drug vial and place vial on a firm, non-skid surface. Peel open pouch containing the vial adapter. Holding vial adapter housing, place over the drug vial and firmly press down to puncture the septum. The adapter will snap over the vial cap and lock in place.

2 Peel open pouch containing the syringe and atomizer. Attach the syringe tip to the vial adapter thread by turning clockwise.

3 Turn the vial upside down and slowly pull back on the syringe plunger to fill syringe with medication. Pull to desired amount by reading the volume markings on the syringe barrel.

4 Detach the syringe from the vial adapter by turning counter-clockwise.

5 Attach the syringe to the atomizer thread by turning clockwise.

6 Insert cone of the atomizer into the patient's naris and administer drug by slowly pushing down on the syringe plunger until all of the drug is out of the syringe.

Tomcat / Small Animal Urinary Catheter – Length Adjustable

ONE CATHETER REPLACES TWO!

- Same catheter is used to unblock and leave indwelling to drain the bladder. This single device technique is designed to reduce the risk of infection and trauma associated with a two catheter technique.
- FLUSHING STYLET (optional) enables irrigation and retropulsion through the catheter during insertion.
- Suture device can be moved to adjust indwelling depth.
- Non-irritating radiopaque polyurethane material is rigid for easy insertion and softens with body temperature.
- Finished open tip
- Luer lock for secure attachment to a CLOSED COLLECTION SYSTEM (see pages 42-43).
- The 25cm catheter length allows for the most flexibility when securing the catheter. The additional length of tubing allows for securement of the collection bag connector at the tail or back of the cat, minimizing catheter tension at the prepuce when the cat moves. This eliminates the need for a separate extension tube.
- Improvement to the standard Tomcat, Jackson and Slippery Sam™ urinary catheters from other manufacturers.

DESCRIPTION	ITEM #
3.5Fr - catheter, length adjustable up to 15cm (6in)	UC306
3.5Fr - catheter, length adjustable up to 15cm (6in), with stylet	UC306S

5Fr - catheter, length adjustable up to 15cm (6in)	UC506
5Fr - catheter, length adjustable up to 15cm (6in), with stylet	UC506S
5Fr - catheter, length adjustable up to 25cm (10in)	UC510
5Fr - catheter, length adjustable up to 25cm (10in), with stylet	UC510S

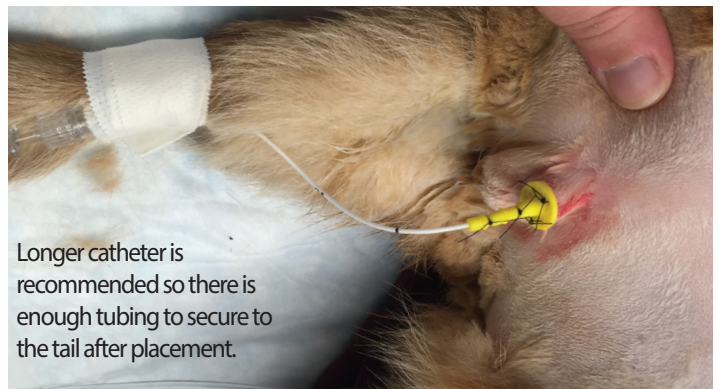

See pages 42-43 for URINE COLLECTION options. See page 38 for 4FR FOLEY CATHETER.

USER TIP

For additional securement, use tape to bridge across the catheter and suture device before suturing in place.

Tomcat / Small Animal Urinary Catheter – Length Adjustable

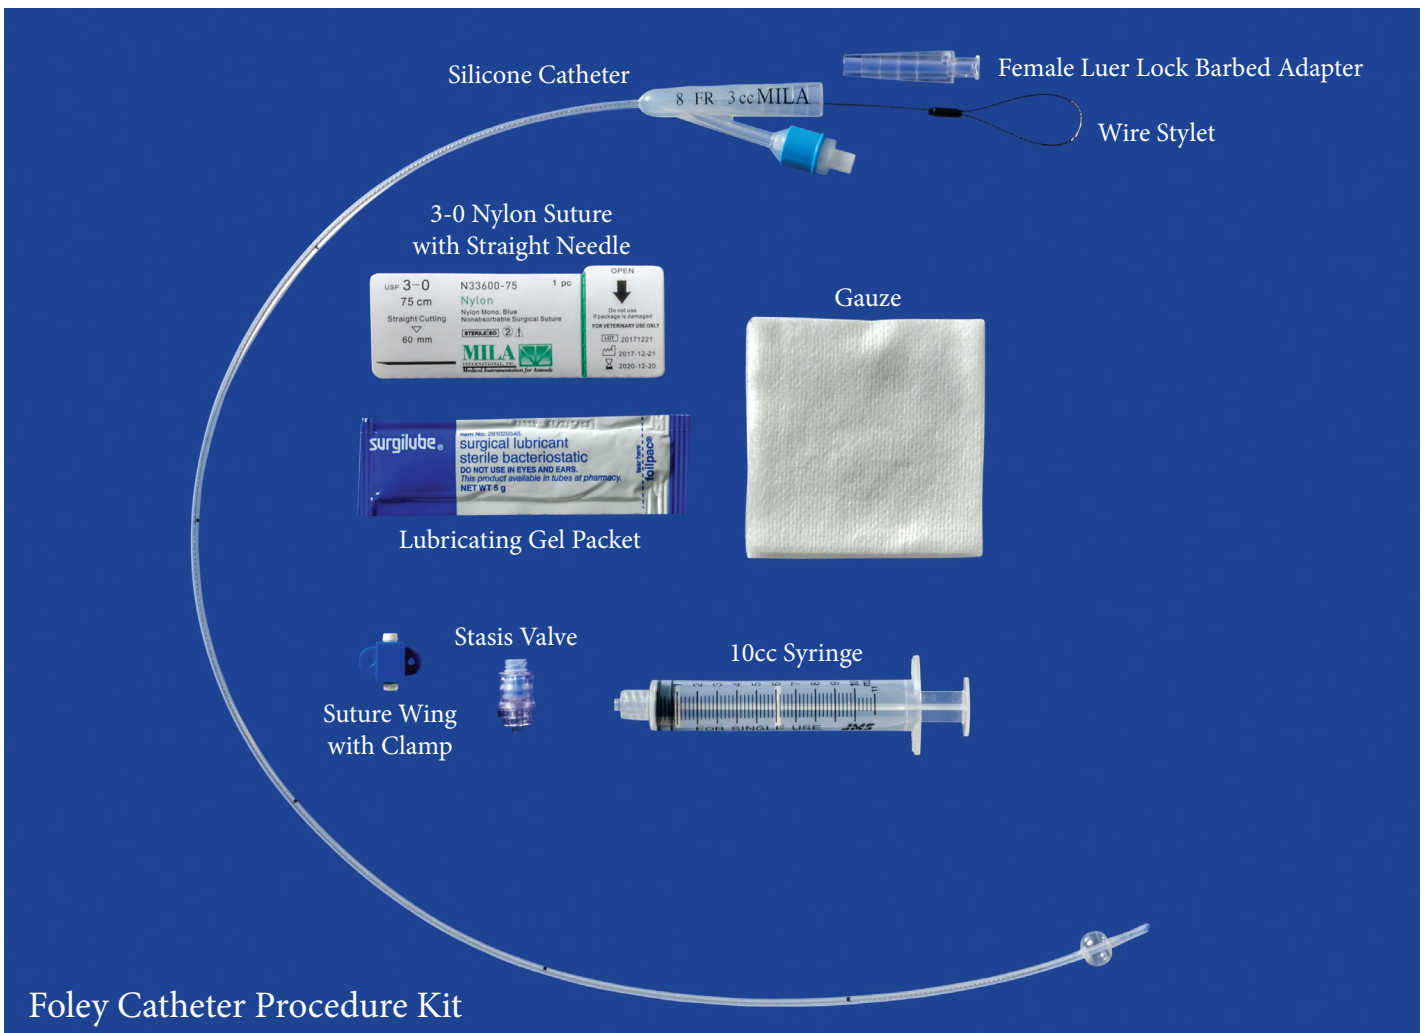

Foley Catheters with Wire Stylet in a Procedure Kit

- Kit includes radiopaque silicone foley catheter, wire stylet, suture wing, suture pack, female luer lock barbed adapter, stasis valve, lubricating gel packet, gauze and syringe.
- The stylet provides rigidity to save time and reduce the risk of trauma.
- Water activated treatment within the lumen facilitates wire removal.
- Retention balloon keeps catheter in the bladder.

Retropulsion™ Urinary Catheters (RUC) for Male Canine

The Retropulsion™ Catheter is a short-term urinary drainage catheter for unblocking the urethra and drainage of the bladder in male dogs. The catheter allows for efficient retrograde hydropulsion of lodged urethral calculi into the bladder.

- Radiopaque, polyurethane, firm catheter with a tapered, soft, flexible tip designed to be atraumatic and safely pass through the urethra into the bladder. The polypropylene/red rubber hybrid gives the catheter unique rigidity.
- Multiple side-holes and end-hole for maximum velocity saline vortex during retrograde hydropulsion.
- Blue color catheter ideal for visualizing the urethra during urethrostomy.
- End-hole at catheter tip allows passage of a guidewire (up to 0.035") for over-the-wire catheter exchange. Minimum guidewire length of 173cm is required. This allows for rapid, easy exchange to a long-term foley using an open-ended silicone foley and guidewire.
- Centimeter markings for precise depth placement.
- Luer lock hub for easy connection to drainage bag or syringe.

DESCRIPTION	ITEM #
6Fr x 55cm (22in)	RUC655
8Fr x 55cm (22in)	RUC855
10Fr x 55cm (22in)	RUC1055

Foley Catheters for Female Canine Guidewire/Seldinger Insertion

- Guidewire inserted foley catheter for female dogs.
- Stainless steel guidewire with J tip, 70cm length.
- Foley catheter with retention balloon.
- Water activated lubricant facilitates wire removal.
- Introducer with depth markings and flexible tip.
- Radiopaque silicone material.
- Kit includes catheter with balloon, guidewire, dilator, drape, lubricant, suture, suture wing, female luer lock barbed adapter, stasis valve, gauze and syringe.

"I strongly believe this improvement will help enormously with a much easier and safer placement of a urinary foley catheter in female dogs. And most importantly, it will offer better control of hygiene during catheter placement."

Developed in cooperation with Joris Robben, Associate Professor in Emergency and Intensive Care Medicine at the Small Animal ICU of the Faculty of Veterinary Medicine of Utrecht University

DESCRIPTION	ITEM #
6Fr x 35cm (14in) with 1.5cc balloon	UCG610
8Fr x 35cm (14in) with 3cc balloon	UCG810

PERCUTANEOUS Balloon Catheter Kit for Cystostomy

Ideal for
GOATS

- Introduction uses Seldinger technique and peel-away dilator sheath.
- Open-ended silicone catheter with 20cc retention balloon, centimeter markings and radiopaque stripe.
- 20Fr x 25cm (10in) catheter with Y-port and fixation ring.
- Short catheter tip design reduces the risk of gastric mucosa irritation.
- Large funnel Y-port with tethered caps.
- Adjustable fixation ring prevents catheter migration.
- Kit includes drape, catheter-over-needle introducers, syringe, 12Fr dilator, scalpel, 24Fr dilator with peel-away sheath, catheter with clamp, gauze and suture.

ITEM #

PBC20

SURGICAL Balloon Catheter for Cystostomy

- Open-ended silicone catheter with 20cc retention balloon, depth markings and radiopaque stripe.
- Short catheter tip design reduces the risk of gastric mucosa irritation.
- Large funnel Y-port with tethered caps.
- Adjustable fixation ring prevents catheter migration.
- Clamp included

Locking Pigtail Catheter Kit

Emergency
Cystostomy

- For emergency indwelling drainage
- Ideal for emergency cystostomy in patients with urinary obstructions that cannot be manually unblocked.
- Percutaneous cannula-over-needle placement facilitates controlled, minimally invasive catheter introduction.
- Soft, flexible, kink resistant, radiopaque polyurethane catheter
- Side holes positioned within catheter pigtail for effective drainage
- Locking string system prevents accidental uncoiling of the pigtail.
- Pigtail (coil) helps retain the catheter in place.
- Includes cannula with direct puncture needle, pigtail catheter, suture wing, collection line and 600cc collection bag.

DESCRIPTION	ITEM #
6Fr x 30cm (12in)	PT625
8Fr x 30cm (12in)	PT825

Locking Pigtail
Catheter Kit

Hemodialysis Catheter Kit

- Two D-shaped lumens for optimal, high blood flow rates.
- Soft polyurethane catheter designed to minimize catheter kinking.
- Flexible tip design for ease of placement and to minimize risk of vascular trauma.
- Silicone extension lines for improved durability during repeated clamping.
- Staggered exit ports designed to reduce recirculation.
- Moveable clamp allows for anchorage at the incision site, regardless of catheter indwell length.
- Rotating suture wing.
- Includes a double lumen polyurethane catheter with silicone extension lines, guidewire, dilator, drape, scalpel, introducer, suture, suture wing, male caps and gauze.

DESCRIPTION	ITEM #
7Fr x 16cm (6.3in)	HDL716
8Fr x 16cm (6.3in)	HDL816

Hemodialysis
Catheter Kit

Unique blend of thicker walls combined with a double D cross section allows for maximum flow rates with significant resistance to kinking.

Blake Drain with Trocar (Peritoneal Dialysis)

★
NEW

- Design of drain allows fluid to move through channels. The only suction is at the proximal end of the channels, so omentum does not stick.
- Silicone radiopaque fluted drain.
- Length of drain area = 20cm (8in), overall length 80cm (32in).
- Ideal for peritoneal dialysis.
- Length adjustable at both ends.

DESCRIPTION	ITEM #
8mm with 16Fr (5.3mm) trocar	BL8
11mm with 16Fr (5.3mm) trocar	BL11

Use female luer to connect to collection bag for peritoneal dialysis. See bag options below.

- 600cc Closed System includes: 600cc collection bag with anti-reflux valve and twist drain, 72in (180cm) lightweight collection line with 360° spinner luer lock and injection/sampling port, and female luer lock barbed adapter.
- 1000cc Closed System includes: 1000cc collection bag with anti-reflux valve and twist drain, 72in (180cm) lightweight collection line with 360° spinner luer lock and injection/sampling port, and female luer lock barbed adapter.
- 2000cc Closed System includes: 2000cc collection bag with anti-reflux valve and push/pull drain, 72in (180cm) collection line with injection/sampling port, and integrated barbed adapter.

MILA Guardian™ Chlorhexidine-Impregnated Protective Foam Disc

Ideal for Drains,
Esophagostomy Tubes and
Hemodialysis Catheters

CLINICALLY PROVEN TO REDUCE THE RISK OF CATHETER-RELATED INFECTIONS

- Chlorhexidine dressing with 360° of skin antiseptis protects the entire insertion site of percutaneous devices.
- Designed to reduce risk of infection by absorbing exudate and inhibiting or killing bacteria.
- 1 inch (2.54cm) diameter with 7mm center opening and radial slit for easy placement.
- Each disc provides **7 DAYS** of protection.

Fecal Management System

FOR COLLECTION OF LIQUID STOOL AND ODOR CONTAINMENT

The Fecal Management System is a 20Fr, 24Fr or 28Fr soft, silicone catheter inserted into the rectum for collection of liquid stool. It is retained by an air-inflated low pressure balloon. The proximal end of the large bore tube attaches to a 2000ml collection bag.

- Catheter size is determined by the size of the patient:

- 20Fr for small and medium size dogs.
- 24Fr for medium and large size dogs.
- 28Fr for extra large dogs.

Approximate balloon sizes by volume of air:

Sizes are approximate. Balloon may not be symmetrical when inflated. Volume of air should be determined prior to insertion and should be estimated based on normal stool size. Do not overinflate the balloon.

- Balloon size is determined by approximating the normally formed stool size.
- Reduces infection risk to other animals and humans.
- Measurement lines help to calculate fluid losses.
- Greatly reduces clean up time and supplies.
- Keeps odor contained.

DESCRIPTION	ITEM #
20Fr catheter, extension line, 1 2000ml collection bag	FM2000
24Fr catheter, extension line, 1 2000ml collection bag	FM2400
28Fr catheter, extension line, 1 2000ml collection bag	FM2800
2000ml Replacement Bag	FMRB

NEW

"I am happy to have worked with MILA to help solve the problem of managing patients with liquid diarrhea. This system helps improve patient care, decrease technician time required keeping patients clean, helping prevent fecal scald, and odor management in addition to monitoring fluid losses to help guide therapy.

Your technicians and patients will thank you for using the system."

Melissa Edwards DVM, DACVECC

PinkPoly™ Economy Catheters

The Red Rubber Improvement

Everyday Economy
for Short Term Use

- Use for nasogastric or neonatal feeding, esophagostomy, urine drainage, oxygen delivery and small animal BAL (see page 74).
- Non-leaching, non-irritating, latex-free polymer (PVC hybrid) construction that becomes firm when cold and softens with body temperature.
- Clear catheter body designed to easily visualize contents within the catheter.
- Radiopaque Pink Stripe eliminates need for contrast. Entire catheter of #PP316 (3.5Fr) is completely radiopaque.
- Rounded, closed tip with staggered eyelets help to maintain tip strength during insertion and promote efficient drainage.
- Smooth, polished surface inside and out. Minimizes trauma during catheter insertion and removal.
- Centimeter markings on 8Fr-18Fr for precise depth placement.
- Longer lengths for 8Fr and 10Fr can be used for urinary catheterization for male dogs.
- Female luer hub eliminates need for barbed adapter. Connect DIRECTLY to your syringe or collection set.

DESCRIPTION	HUB STYLE		ITEM #
3.5Fr x 40cm (16in)	Female Luer		PP316
5Fr x 40cm (16in)	Female Luer		PP516
8Fr x 40cm (16in)	Female Luer		PP816

10Fr x 55cm (22in)	Female Luer		PP1022
10Fr x 108cm (42in)	Female Luer		PP1042
12Fr x 40cm (16in)	Funnel		PP1216
12Fr x 55cm (22in)	Female Luer		PP1222
14Fr x 40cm (16in)	Funnel		PP1416
18Fr x 40cm (16in)	Funnel	**Ideal as a MARE URINARY CATHETER**	PP1816
18Fr x 120cm (47in)	Funnel	**Ideal as a STALLION URINARY CATHETER**	PP1847

Each individually packaged and sterile.

PinkPoly™ Catheter Adapters

- Barbed adapters to connect to luer lock or funnel hubs.

DESCRIPTION		ITEM #
Large dual ends to fit 12-36Fr tubes	(10 pack)	2300
Small end fits 12 - 18Fr tubes. Large end fits 22 - 33Fr tubes	(10 pack)	2320
Male Luer Lock with adapter to fit 11 - 22Fr tubes (Ideal for oxygen)	(10 pack)	2370
Male Luer Lock with adapter to fit 20 - 40Fr tubes	(10 pack)	2380

Each individually packaged and sterile.

Gastrostomy Kits

- Radiopaque polyurethane material is non-irritating and stronger than silicone.
- Collapsible bumper facilitates insertion and removal that is less traumatic than mushroom style. KINDER REMOVAL.
- Right angle fixation device that holds tube securely.
- Locking Y-adapter for feeding, irrigation, decompression and medication without disconnection.

Use with
MILA Guardian™
to reduce risk of infection.
See page 59 for details.

SURGICAL PLACEMENT

Surgical Kit includes 50cm (20in) PEG tube, right angle fixation device, optional silicone fixation bar (as an alternative to the right angle fixation device), Y-adapter and clamp.

DESCRIPTION	ITEM #
16Fr Surgically Placed Kit	PGS16
20Fr Surgically Placed Kit	PGS20

ENDOSCOPIC PLACEMENT

Endoscopic Kit includes introducer needle, guidewire with loop, 62.5cm (25in) PEG tube with loop, right angle fixation device, optional silicone fixation bar (as an alternative to the right angle fixation device), Y-adapter and clamp.

DESCRIPTION	ITEM #
16Fr Endoscopically Placed Kit	PEG16
20Fr Endoscopically Placed Kit	PEG20

Compatible jejunal feeding tubes on next page.

Jejunal Tubes (J thru G)

For SURGICALLY PLACED J-tubes, refer to STERILE Nasogastric Feeding Tubes on pages 52-54.

- The tubes listed below must be placed through either a 16Fr or 20Fr MILA PEG tube (on previous page).
- Continuous nutritional support via a jejunal tube positioned in duodenum or jejunum.
- Sealed Twoomey adapter permits evacuation of stomach from side port and placement of J-tube through top port and locks the J tube in place. No up/down slippage or leakage.
- Grip tip on tube for grasping with endoscope.
- Color coded purple luer lock to indicate for enteral nutrition only.
- All sizes have an ENFit™ connection on the proximal end. Two ENFit™ syringes are included.

DESCRIPTION	ITEM #
6Fr x 90cm (36in) - Order PEG16 or PGS16	J636
8Fr x 90cm (36in) - Order PEG20 or PGS20	J836
10Fr x 90cm (36in) - Order PEG20 or PGS20	J1036

Mic-Key™ Low Profile Gastrostomy Device

Use with MILA Guardian™ to reduce risk of infection. See page 59 for details.

- Unique balloon style cuff enables insertion and removal without trauma after the stoma is formed.
- Kit includes patient care kit with 6cc & 35cc syringes, right angle feeding set, bolus feeding set and caregiver guide.
- Available in 12Fr, 14Fr, 16Fr, 18Fr, 20Fr and 24Fr diameters. Many lengths from 0.8cm up to 5.0cm. Length is measured from the proximal side of the balloon to the skin surface. Scan the QR code to see all available sizes.
- Special order item, allow additional time for delivery.

Gastrostomy Catheter

- Surgically placed open-ended silicone G tube with 20cc retention balloon, radiopaque stripe, fixation ring, Y-Port and clamp included. **Item #CYTB sold separately.**
- Ideal for J through G catheterization.

DESCRIPTION	ITEM #
20Fr x 25cm (10in), fits up to a 10Fr G tube	CYGA20
24Fr x 25cm (10in), fits up to a 12Fr G tube	CYGA24
28Fr x 25cm (10in), fits up to a 14Fr G tube	CYGA28
Tuohy Borst Adapter for Large Bore Catheters	CYTB

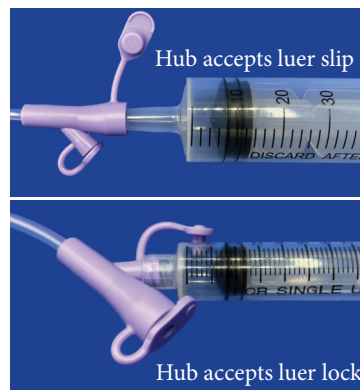

Use with Item #CYTB to prevent the backflow of fluid around the catheter or instrument inserted through the gastrostomy tube.

NG Plus Feeding Tube with Flushing Stylet

- Use for gastric decompression and enteral feeding and surgically placed jejunal tubes (see STERILE items listed below).
- Round, soft, atraumatic closed tip with side holes.
- **Flushing stylet pre-loaded in every tube to facilitate insertion and designed to allow easy wire removal in tight turns.**
- Stylet allows the user to reliably test for negative pressure after tube placement and before stylet removal.
- Dual port designed for catheter-tip, luer-lock and luer slip syringes. No adapter required!
- Superior kink resistance.
- Non-irritating, LOW FRICTION, clear radiopaque polyurethane with purple stripe, depth markings and two suture wings to secure the tube in place.
- PURPLE is the recognized SAFETY color code for FEEDING.

10Fr x 108cm (43in) - 3 Gram weight	NGP1043W
12Fr x 108cm (43in) - 3 Gram weight	NGP1243W

Feeding Tube Extension Set

- Color-coded purple for safety, to indicate feeding.
- Male luer fits the port of all MILA yellow and purple NG Tubes.
- Priming volume is 9.4ml.
- Total length is 152cm/60in.

DESCRIPTION	ITEM #
Large Bore Feeding Tube Extension Set with Rotating Male Luer Lock, Clamp and Female Luer. Priming Volume = 9.4ml 13Ga x152cm (60in)	FTE60

UV-Blocking Extension Sets and Medication Bag Covers

- Amber tubing provides protection for light sensitive liquid medications, reducing the risk of molecule crystallization and photo-degradation.
- Mini-bore UV Blocking extension set with female luer, clamp and rotating male luer lock.
- Set can connect to MILA Nasogastric tube for medication delivered enterally.
- Use with bag cover, item #UVB-B, for complete protection of light-sensitive liquid medications. Includes 10 bag covers.

DESCRIPTION	ITEM #
Mini Bore UV Blocking Extension Set with Female Luer, Clamp, Rotating Male Luer Lock 23Ga x 25cm (10in), Priming Volume = 0.2ml	UVB10
23Ga x 152cm (60in), Priming Volume = 0.65ml	UVB60

ENFit™ Nasogastric Feeding Tubes

DESIGNED TO REDUCE THE RISK OF TUBING MISCONNECTIONS

- Luer specially designed to only accept ENFit™ connections.
- NON-WEIGHTED and WEIGHTED tubes available in the same sizes as the other nasogastric tubes.
- Accessories with ENFit™ connections also available. See MILA website for more details.
- **Special order item.** Please allow up to 2 weeks for delivery. See MILA website for pricing.

Large Animal Nasogastric Tubes

- Use for gastric decompression and enteral feeding.
- Non-irritating radiopaque polyurethane
- Stylet to facilitate insertion.
- Centimeter markings
- Y-adapter for feeding, medicating and flushing.
- LENGTH ADJUSTABLE AFTER PLACEMENT by cutting the proximal end and replacing Y-adapter.

Length Adjustable
AFTER Placement

DESCRIPTION

NG18100

Adjusting length of feeding tube after placement:

1

Remove hub collar by unscrewing it from the top portion of the Y-adapter.

2

Pull tubing off Y-adapter.

3

Trim tubing to desired length.

4

Place hub collar back on tubing. Push tubing back on to Y-adapter, over the barb.

5

Push hub collar up toward the Y-adapter.

6

Tighten hub collar by screwing to the top portion of the Y-adapter.

TAPERED OPEN END WITH SIDE HOLES
AND RADIOPAQUE STRIPE

Esophagostomy Feeding Tubes – Polyurethane

Length Adjustable
AFTER Placement

The MILA polyurethane esophagostomy tubes have larger inner diameters and thinner walls, compared to silicone esophagostomy tubes. The larger lumen allows for higher flow rates and reduces the risk of clogging. MILA material technology resists kinking.

Esophagostomy Feeding Tube Placement

Retrograde Technique: Tunneler for Esophagostomy Feeding Tube Placement

EASIER AND FASTER – Retrograde tunneling greatly improves the ability to easily, safely and quickly position the MILA length adjustable Esophagostomy Feeding Tubes. See MILA website for link to YouTube video.

DESCRIPTION	ITEM #
14Fr Esophagostomy Tube Tunneler use for sizes 10Fr and 14Fr tubes	ETUN14
18Fr Esophagostomy Tube Tunneler	ETUN18

This technique allows the distal tip of the catheter to be manually passed through the mouth into the esophagus. The proximal end of the tube is pulled through the neck with the tunneler. The tube is then cut to the desired length and the Y-adapter secured in place.

1 Identify the external landmark for catheter to exit. Measure and mark the esophagostomy tube.

2 Advance the tunneler through the mouth and into the esophagus. Rotate the tunneler to angle the tip laterally.

3 Make a small incision down to the tunneler, then advance the tunneler through the incision.

4 Grasp the end of the tunneler with hemostats to prevent retraction.

5 Trim flare off the end of the catheter then attach other end of the esophagostomy tube to the tunneler.

6 Gently pull the tunneler through until the tube flips.

7 Trim the tube to desired length and reattach the Y-adapter. Secure the catheter.

Antegrade Technique: Tube Passer for Esophageal Feeding Tube Placement

Designed to facilitate placement of E-tubes and reduce the risk of bleeding and subsequent skin infections. It is available in 3 different sizes and is compatible with all E-tubes as well as Esophageal Balloon Dilation Feeding Tubes used for management of esophageal strictures (pages 60-61). See MILA website for detailed instructions and videos.

DESCRIPTION	ITEM #
18Fr Introducer for 10Fr BE Tube and 14Fr Esophagostomy Tube	BE18MI
22Fr Introducer for 14Fr BE Tube and 18Fr Esophagostomy Tube	BE22MI
26Fr Introducer for 18Fr BE Tube	BE26MI

1 Pass the tip of tube passer between the angle of the mandible and the thoracic inlet, and dorsal to the jugular vein. Push the tube passer through the small incision.

2 Separate and remove the stylet from the tube passer.

3 Pass the esophagostomy tube retrograde and withdraw the tube passer via the mouth to avoid passing oral contaminants through the incision.

4 Pass the tapered end of the esophagostomy tube down the esophagus.

Percutaneous Balloon Catheter Kit for Gastrostomy

Ideal for GOATS

- Introduction uses Seldinger technique and peel-away dilator sheath.
- Open-ended silicone catheter with 20cc retention balloon, centimeter markings and radiopaque stripe.
- 20Fr x 25cm (10in) catheter with Y-port and fixation ring.
- Short catheter tip design reduces the risk of gastric mucosa irritation.
- Large funnel Y-port with tethered caps.
- Adjustable fixation ring prevents catheter migration.
- Kit includes drape, scalpel, catheter-over-needle introducers, 12Fr dilator, 24Fr dilator with peel-away sheath, catheter with clamp, gauze, suture and syringe.

Esophageal Balloon Dilation Feeding Tube

Use this one-stage esophageal balloon dilation feeding tube for palliative management of benign esophageal stricture and for feeding of cats and dogs. This is an effective single-procedure alternative to repeated expensive balloon dilations and incorporates the esophageal feeding tube.

DESIGN: The BE-tube features a double balloon surrounding the feeding tube. A compliant outer balloon covers a non-compliant inner balloon for optimal, low profile, long term, routine, dilation of strictures performed by the owner at home.

- The tube is clear, non-irritating polyurethane ideal for long term use. Latex free.
- Lateral ports minimize catheter occlusion.
- Radiopaque line for x-ray visualization to aid in precise placement.
- Accessory kit contains two hydrophilic nitinol wires with steerable tip (.035in x 80cm and .035in x 150cm), a Centesis Valve (#175450NB) and a stopcock (#2405).
- Items needed for placement and operation of the BE-tube are the accessory kit, peel-away introducer or stainless steel introducer and inflation device.

See MILA website for link to YouTube video.

See 2018 publication at the web address below or scan the QR code:
Tan DK, Weisse C, Berent A, Lamb KE. Prospective evaluation of an indwelling esophageal balloon dilation feeding tube for treatment of benign esophageal strictures in dogs and cats. J Vet Intern Med. 2018;00:1-8. <https://doi.org/10.1111/jvim.15071>

DISCUSSION: Once a BES has been diagnosed and traditionally balloon-dilated, the BE-Tube is placed similarly to a standard esophageal feeding tube (E-Tube) with some technical differences. The owner performs twice daily balloon dilations at home, in their unsedated pet, using predetermined air volumes. This tube can also provide supplementation of food, water and medications. While stricture dilation can be uncomfortable in humans, the initial stricture effacement would occur under the initial anesthetic episode so subsequent dilations would not be expected to be associated with discomfort. In between the daily dilation procedures, the balloon would be self-constrained permitting passage of normal food and liquid boluses. The BE-Tube is typically removed approximately 4-6 weeks later, often under general anesthesia, for repeat esophagoscopy to confirm stricture resolutions. It can also be removed in an awake patient.

-Chick Weisse, VMD, DACVS

Items Needed to Place and Operate Esophageal Balloon Dilation Feeding Tube

1.

Select the appropriate balloon size and length for the esophageal feeding tube.

Balloon Diameters
(Actual Size)

DESCRIPTION	ITEM #
10Fr x 75cm (30in) Feeding Tube with a balloon 10mm diameter x 12cm length - Order with BE18MI.	BE1012

DESCRIPTION	ITEM #
60cc Inflation Device Required	BE-BIG60

Guidewire Inserted Chest Tube Procedure Kit

- Place using local anesthetic and sedation.
- Single lumen, radiopaque, polyurethane catheter with multiple fenestrations.
- Use for pyothorax, hemothorax, pneumothorax, emergency peritoneal lavage or pericardial drain.
- Insertion is the Seldinger catheter-over-guidewire technique.
- Stasis valve prevents air from entering chest eliminating the need for a three-way stopcock.
- Additional suture wing for secure length adjustment and attachment.
- Multiple drainage holes.
14Ga fenestrated up to 4cm or 8cm mark.
12Ga fenestrated up to 6cm or 15cm mark.
12Fr fenestrated up to 16cm mark.
- 12Ga and 14Ga catheter kits include introducer catheters, guidewire, dilator, chest tube catheter, suture wings, stasis valve and cap.
12Fr catheter kit includes a scalpel, introducer catheter, guidewire, dilator, chest tube catheter with pre-loaded stiffening stylet, suture wing, 3-0 suture, stasis valve, cap, drape and gauze.

See MILA website for link to YouTube video.

DESCRIPTION	ITEM #

Chest Tube with Sharp Trocar and Adapters

- Sizes 10, 12 and 14Fr include clamp and barbed adapter.
- Sizes 16, 20, 24, 28 and 32Fr include clamp, barbed adapter and 36 inches (90cm) of sterile bubble tubing.
- Open end with two large side holes
- Centimeter markings
- PVC material

DESCRIPTION	ITEM #
10Fr x 19cm (7.5in)	CTT10S
12Fr x 19cm (7.5in)	CTT12S
14Fr x 19cm (7.5in)	CTT14S
16Fr x 21cm (8in)	CTT16
20Fr x 34cm (13.5in)	CTT20
24Fr x 34cm (13.5in)	CTT24
28Fr x 34cm (13.5in)	CTT28
32Fr x 34cm (13.5in)	CTT32

Silicone Chest Tubes

- Very kink resistant.
- Radiopaque, single lumen, open end with multiple side holes.
- Use for drainage of air or fluid.
- Surgically placed.
- Includes clamp, female luer lock barbed adapter or stopcock. See photos below.

DESCRIPTION	ITEM #
12Fr x 38cm (15in) with 5cm of side holes	CT1215
14Fr x 38cm (15in) with 7cm of side holes	CT1415
20Fr x 38cm (15in) with 10cm of side holes	CT2015
20Fr x 55cm (22in) with 10cm of side holes	CT2022
30Fr x 55cm (22in) with 12cm of side holes	CT3022

Heimlich Valve

One-way valve to allow for the evacuation of air and/or fluid

- #H2900 is a pillow style with a male luer lock adapter for guidewire inserted chest tubes and a barbed adapter for funnel-ended chest tubes.
- #H5300 is a semi-rigid cylinder style with an adapter for guidewire inserted chest tubes.

DESCRIPTION	ITEM #
Pillow style, 12cm (5in) pillow length, fits 12-30Fr tubes or catheters with a luer lock hub	H2900
Semi-rigid cylinder style, 16cm (6.5in) cylinder length, fits 20-40Fr tubes and catheters with a luer lock hub	H5300

Chest Tube Adapter with Stopcock

- Adapter includes a three-way stopcock, clamp and barbed adapter.
- Fits 18-34Fr flare-end chest tubes.
- Can be used with a variety of tubes such as drains and nasogastric feeding tubes.

DESCRIPTION	ITEM #
16Fr x 17cm (7in)	175420
20Fr x 25cm (10in)	175425

Suction Connector for Bilateral Chest Tubes

- Connects bilateral chest tubes to a single vacuum source.
- Luers allow easy disconnect and reconnect.
- Bubble tubing can be cut to accommodate various underwater seal sets.
- Works well with items #175420 and #175425 (Chest Tube Adapter with Stopcock).

DESCRIPTION	ITEM #
20Fr Suction Set	175800

Chest Tube Suction Bulb with 360° Spinning Luer Lock Adapter

- 360° spinning luer lock adapter for secure attachment to MILA Guidewire Chest Tube. Resists twisting and kinking of the catheter during movement. Avoids accidental unscrewing.
- Continuous gentle suction.
- Add female luer lock barbed adapter (Item #2350) for use with chest tubes that have a flared proximal end (other manufacturers).
- Internal anti-reflux valve to prevent backflow of fluid to the patient.
- Volume markings provide easy measurement.

DESCRIPTION	ITEM #
100cc suction bulb	CG100
150cc suction bulb	CG150
200cc suction bulb	CG200
400cc suction bulb	CG400

Female luer lock barbed adapter accepts
20-40Fr tube. Each individually packed and sterile 2350
(10 pack)

* Item number CG400 has a push-on cap.

When the stasis valve is connected to the chest tube extension, the suction bulb can be safely removed without compromising the chest tube because the stasis valve is designed to remain closed until activated by a male luer, eliminating the need for a 3-way stopcock.

NOTE: To reduce the risk of contamination, do not reconnect the suction bulb if it becomes disconnected. If the stasis valve is disconnected from the chest tube extension, immediately clamp the extension and replace it with a new (sterile) stasis valve (Item #8200 on page 21).

All MILA guidewire chest tube kits include a stasis valve.

Chest Tube Adapter for Suction Systems

- Securely connect female luer lock or funnel style chest tubes to suction systems from other manufacturers (e.g. Pleur-evac® and Thora-Seal™).
- Contains three barbed adapters and bubble tubing that can be trimmed to fit the suction device.

ITEM # 175380

Bubble Tubing

- Has an inconsistent inner and outer diameter (wide and narrow areas every few feet) making it versatile.
- Cut sections to transition between unequal barbed connectors. For example, connecting a small barbed adapter from a chest drain to a large barbed adapter on a Pleur-evac® suction set.
- Keep for a variety of unpredictable needs related to stomach tubes, feeding tubes, chest tubes, O₂ delivery, etc.

DESCRIPTION	ITEM #
3 Feet (≈1 meter) in length, Sterile	BT03
20 Feet (≈6 meters) in length, Non-sterile	BT20

Available in
3 feet (≈1 meter) &
20 feet (≈6 meters)

Echogenic Fenestrated Centesis Catheters

- Catheter-over-needle style with smooth transition from needle to catheter that aids in placement.
- Three large skived holes for maximum drainage and to minimize clogging.
- Echogenic needle with bevel indicator for enhanced visibility on ultrasound.
- Clear needle hub for flashback confirmation.

DESCRIPTION	ITEM #
4Fr (18Ga) x 7cm (2.75in)	175042
4Fr (18Ga) x 10cm (4in)	175044
5Fr (16Ga) x 7cm (2.75in)	175052
5Fr (16Ga) x 10cm (4in)	175054
5Fr (16Ga) x 15cm (6in)	175056

Fenestrated Centesis Catheters

Great for tapping pericardial effusion in dogs.

- Catheter-over-needle style designed for smooth transition off of the stylet.
- Fenestrated with three side holes at the distal end. Item #1212F has four side holes.

DESCRIPTION	ITEM #
18Ga x 9cm (3.5in)	1804F
16Ga x 7.5cm (3in)	1604F
14Ga x 9cm (3.5in)	1404F
14Ga x 13cm (5.25in)	1412F
12Ga x 13cm (5.25in)	1212F

Centesis Adapters – Automatic 3-Way

Drainage Bag with
Spike Port Included

- Unique valve allows aspiration and evacuation without disconnecting the syringe and without turning a stopcock. SAVES TIME AND AVOIDS MISTAKES.
- Use as a chest tube adapter to avoid risks associated with three-way stopcocks.
- Use for chest tap, belly tap or anytime you want to remove a large volume of air or fluid.
- See pages 98-99 for information on use for AUTOTRANSFUSION.
- KIT INCLUDES:
 - 1000ml collection bag with anti-reflux valve, 38cm/15in drain line with luer lock, pull-down fluid drain port and spike port for autotransfusion.
 - Centesis Adapter
 - Female luer lock barbed adapter that fits 20-40Fr flared tubes
 - 60cc Syringe
- Centesis adapters also sold individually.
See item numbers with "NB" below.

DESCRIPTION	ITEM #
CENTESIS ADAPTER KITS: Better Value	
Centesis Adapter with Spin Luer Lock - No Extension	175440
Centesis Adapter with total Length 12.5cm (5in)	175450
Centesis Adapter with total Length 40cm (16in)	175460

ADAPTERS ONLY:

Centesis Adapter with Spin Luer Lock	175440NB
Centesis Adapter with total Length 12.5cm	175450NB
Centesis Adapter with total Length 40cm	175460NB

How the Automatic 3-Way Works:

See MILA website for link to YouTube video.

STIMPOD 450X

- A nerve stimulation device designed to be used by a specifically trained anesthetist during:
 - » General anesthesia for the purpose of establishing the efficacy of a neuromuscular blocking agent using noninvasive surface electrodes (not supplied)
 - OR
 - » Regional anesthesia for the purpose of:
 - Nerve mapping using noninvasive nerve mapping probe (supplied)
 - OR
 - Nerve locating using invasive electrodes (not supplied) or needles (supplied).
- Ability to adjust current, pulse width and twitch frequency.
- Visual and audible feedback is given when the target current and pulse width ranges are reached indicating probable nerve proximity.
- Displays real time waveforms of the currents delivered. Pause mode allows changing stimulus parameters without stimulating.
- Non-linear current adjustment. User can pre-program 20 different current and pulse width settings.
- All items listed below are needed for basic nerve stimulation:
 1. Stimpod (Item #NB-STIM)
 2. Nerve Location and Mapping Probe Cable (Item #NBMP)
 3. Stimulating Needles (Item #NB2205, NB2108 or NB2110)
 4. Crocodile Clip (Item #NBCC). Included with Item #NBMP and #NBCA.

See MILA website for information about educational courses.

Add-on Cables:

- Nerve Mapping Probe (#NBMP) enables nerve location and transcutaneous nerve mapping at higher currents (to a maximum of 20mA), while the tip offers a contact surface small enough to ensure effective discrimination.
- Tri-axial accelerometer (#NBCA) provides real time feedback of the strength of contraction of the affected limb (Train of Four, Double Burst and Post Tetanic Count modes only). The strength of each measured contraction is displayed graphically and the relevant ratios are calculated and displayed.

DESCRIPTION	ITEM #
Stimpod NMS450X Stimulator with Carry Case	NB-STIM
Nerve Location and Mapping Probe Cable (Crocodile Clip included)	NBMP
Tri-axial Accelerometer (Crocodile Clip included)	NBCA
Crocodile Clip for non-adhesive ground	NBCC

NB-STIM

NBMP

NBCA

NBCC

Stimulating Echogenic Needles

Stimulating echogenic nerve block needles are for acute pain management and to help increase overall nerve block success. Use with or without ultrasound guidance.

- 2mm pin connector is compatible with MILA Stimpod and most nerve stimulators.
- Insulated needle cannula with a stimulating tip allows for needle guidance using stimulation.
- B Bevel, echo needle tip designed to increase visibility under ultrasound guidance.
- Centimeter markings on the outer cannula to facilitate precise depth placement.

DESCRIPTION	ITEM #
22Ga x 5cm (2in)	NB2205
21Ga x 8cm (3.1in)	NB2108
21Ga x 10cm (4in)	NB2110

Echogenic Needles for Ultrasound

Echogenic needles feature 360° dimple reflectors located at the distal end that create a more defined ultrasound image from any angle without compromising puncture characteristics.

NERVE BLOCK NEEDLES

- Use for nerve block injections.
- Clear needle tip visualization under ultrasound for safe and precise needle placement.
- Needle bevel is 30° back-cut.

DESCRIPTION	ITEM #
21Ga x 8cm (3.125in)	E2103
21Ga x 10cm (4in)	E2104

MSK/SPINAL NEEDLES

- Use for musculoskeletal and spinal injections.
- Clear needle tip visualization under ultrasound for safe and precise needle placement.
- Needle bevel is Quincke style.

DESCRIPTION	ITEM #
20Ga x 20cm (8in)	E2008
18Ga x 15cm (6in)	E1806
18Ga x 20cm (8in)	E1808

Jackson Pratt Drain with Trocar

- Silicone radiopaque drain with full-length perforations.
- Length of drain area is 20cm (8in), overall length is 80cm (32in).
- Item number JP4 includes an adapter to connect to a suction grenade. All other sizes can connect directly to suction grenade.
- Length adjustable - both ends can be cut.

DESCRIPTION	ITEM #
4.5mm with 8Fr (2.7mm) trocar and adapter	JP4
7mm with 15Fr (5.0mm) trocar	JP7
10mm with 15Fr (5.0mm) trocar	JP10
13mm with 16Fr (5.3mm) trocar	JP13

Select a suction grenade on page 73 to complete the CLOSED system.

Spiral Drain with Trocar

- Design of drain allows for maximum drainage while taking up less space than other drains.
- Silicone, radiopaque, round, spiral fluted drain.
- All sizes include a double luer adapter for connecting the drain to a suction grenade. Item numbers SP07 and SP10 also include tubing with the adapter.
- Length of spiral drain area is 30cm (12in), overall length is 90cm (36in).
- Length adjustable - both ends can be cut.

DESCRIPTION	ITEM #
7Fr (2.4mm) drain with 8Fr (2.5mm) trocar	SP07
10Fr (3.2mm) drain with 11Fr (3.5mm) trocar	SP10
12Fr (4.0mm) drain with 12Fr (4.0mm) trocar	SP12
15Fr (5.0mm) drain with 15Fr (5.0mm) trocar	SP15
19Fr (6.3mm) drain with 19Fr (6.3mm) trocar	SP19

Select a suction grenade on page 73 to complete the CLOSED system.

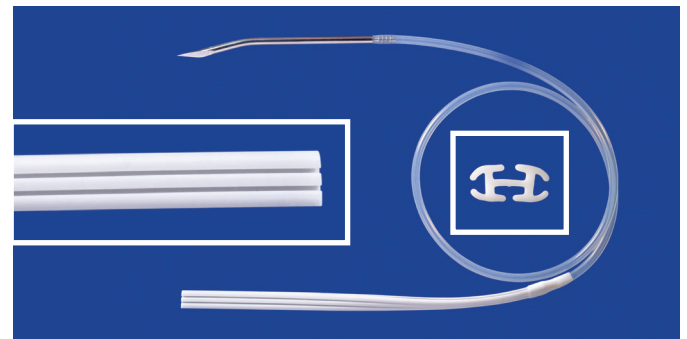

Blake Drain with Trocar

- Design of drain allows fluid to move through channels. The only suction is at the proximal end of the channels, so OMENTUM DOES NOT STICK.
- Silicone radiopaque fluted drain.
- Length of drain area is 20cm (8in), overall length is 80cm (32in).
- Ideal for peritoneal dialysis.
- Length adjustable - both ends can be cut.

DESCRIPTION	ITEM #
8mm with 16Fr (5.3mm) trocar	BL8
11mm with 16Fr (5.3mm) trocar	BL11

Select a suction grenade to on page 73 complete the CLOSED system or select one of the collection bag kits below for peritoneal dialysis.

DESCRIPTION	ITEM #
600cc Collection Bag Kit	UC600K
1000cc Collection Bag Kit	UC1000K
2000cc Collection Bag Kit	UC2000K

Grenade – Continuous Suction for Drain

- Squeeze the air out of the bulb and attach to the drain. Recoil of the bulb creates suction.
- Closed system for fluid collection.
- Attach to any drain - Blake, Jackson Pratt and Spiral.
- Luer lock cap for secure closure and syringe emptying on the 100, 150 and 200cc. 400cc has a push-on cap.
- Low pressure design provides continuous gentle suction and minimizes tissue trauma.
- Volume markings provide easy measurement.
- Internal anti-reflux valve to prevent backflow of fluid to the patient.
- Metal clip for secure attachment.
- Silicone.

DESCRIPTION	ITEM #
100cc suction bulb w/one-way valve	G100
150cc suction bulb w/one-way valve	G150
200cc suction bulb w/one-way valve	G200
400cc suction bulb w/one-way valve	G400

50ml Bellows Suction System

- Squeeze the air out of the bellow and attach to the drain. Recoil of the bellow creates suction.
- 50ml Mini Grenade.
- Supplied with two adapters for connection to all drain sizes.
- Fits Blake, Jackson Pratt and Spiral Drains.
- Low pressure design provides continuous gentle suction and minimizes tissue trauma.

ITEM #	G050

NEW

MILA Guardian™ Chlorhexidine-Impregnated Protective Foam Disc

Ideal for Drains,
Esophagostomy Tubes and
Hemodialysis Catheters

CLINICALLY PROVEN TO REDUCE THE RISK OF CATHETER-RELATED INFECTIONS

- Chlorhexidine dressing with 360° of skin antiseptis protects the entire insertion site of percutaneous devices.
- Designed to reduce risk of infection by absorbing exudate and inhibiting or killing bacteria.
- 1 inch (2.54cm) diameter with 7mm center opening and radial slit for easy placement.
- Each disc provides **7 DAYS** of protection.

ITEM #	DR7
--------	-----

Tracheal Wash & Bronchoalveolar Lavage (BAL) – Small Animal

Blind Method (Tube through Sterile Endotracheal Tube)

- Radiopaque
- Rounded, closed tip with eyelets.
- Smooth, polished surface inside and out.
- Centimeter markings on 8Fr sizes for precise depth placement.
- Does not completely obstruct the ET tube and allows some space for ventilation using the SC15MM.

*Sterile Endotracheal Tubes on pages 76-77.

DESCRIPTION	ITEM #	FITS STERILE ET TUBE SIZES	STERILE ET TUBE ITEM #*
3.5Fr x 40cm (16in)	PP316	2.0mm ID, up to 16.5cm in length	ETC20
5Fr x 40cm (16in)	PP516	2.5 - 4.5mm ID, up to 27cm in length	ETC25R-ETC45R
8Fr x 55cm (22in)	PP822	5.0 - 10.0mm ID, up to 38.5cm in length	ETC50R-ETC100R
8Fr x 108cm (42in)	PP842	10.0 - 11.0mm ID, up to 57.5cm in length	ETC1055, ETC1155
Double Swivel ET Tube Adapter	SC15MM	*****Fits all endotracheal tubes with 15mm connectors*****	

Transtracheal Technique: Medium to Large Dogs

Catheter-over-needle insertion method. The semi-rigid flushing catheter has a stiffening stylet and luer adapter. The flushing catheter is packaged in a protective sleeve to allow aseptic handling (sterile gloves not required).

DESCRIPTION	ITEM #
Medium Sized Dog - 16Ga x 41cm (16in) flushing catheter with 14Ga introducer	TW1616
Large Dog - 16Ga x 70cm (28in) flushing catheter with 14Ga introducer	TW1628

Cytobrush

Collects tissue or mucus samples from the bronchi or upper or lower GI tracts.

See page 75 for additional information.

Endoscopic Guided BAL: Small and Large Animal

Single lumen catheter with female luer lock for medication delivery and sampling at any site accessible by endoscope. To maintain sterility during advancement, these sets contain a water soluble plug in the distal end.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
2.3mm OD x 190cm (76in)	2.5mm	EDC190
1.8mm OD x 200cm (79in)	2.0mm	EDC200
2.3mm OD x 220cm (88in)	2.5mm	EDC220
2.3mm OD x 400cm (160in)	2.5mm	EDC400

Two and three lumen sampling catheters enable a sterile specimen retrieval via an endoscope. To maintain sterility during placement, the outer catheter has a glycol plug in the tip. Once in place, the inner catheter is advanced, pushing out the glycol plug, then further advanced for retrieval of the sterile specimen.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
Two stage catheter 1.8mm OD x 190cm (76in)	2.0mm	EMAC700
Two stage catheter 1.8mm OD x 250cm (100in)	2.0mm	EMAC700L
Triple stage catheter 2.3mm OD x 190cm (76in)	2.5mm	EMAC800

Tracheal Wash & Bronchoalveolar Lavage (BAL) – Large Animal

Transtracheal Technique: Large Dogs, Neonate Foals, Horses

Catheter-over-needle insertion method for direct puncture into the trachea. The semi-rigid flushing catheter has a stylet and luer adapter. The flushing catheter is packaged in a protective sleeve to allow aseptic handling (sterile gloves not required).

Flushing/Sampling Catheter

DESCRIPTION	ITEM #
HORSES/FOALS - 12Ga x 70cm (28in) flushing catheter with 10Ga introducer	TW1228
NEONATE FOALS/LARGE DOGS - 16Ga x 70cm (28in) flushing catheter with 14Ga introducer	TW1628

Cytobrush: Small and Large Animal

Cytobrush collects tissue or mucus samples from the bronchi or upper/lower gastrointestinal tracts.

- Tube within a tube design. The outer tube has a water soluble glycol plug in the distal end to protect the inner lumen brush from contamination as it travels through the endoscope channel. When the sample site is reached, the forward motion of the inner tube safely expels the plug and deploys the brush. After sample collection, the brush is retracted into the outer tube and removed from the scope channel.
- Sheathed catheter with plug for sample protection is 1.8mm x 180cm.
- 10mm bristled brush with outside diameter of 2mm and radiopaque distal end cap.
- Handle with ring provides easy deployment and retraction of brush.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
1.8mm x 180cm (72in)	2.0mm	CYT180

Bronchoalveolar Lavage (BAL)

- Open-end, silicone, radiopaque, heavy wall tube for lavage via the nasotracheal route.
- Distal 30cc balloon cuff can be inflated to prevent retrograde fluid flow around the tube and help stabilize placement.
- Two-way fitting allows simultaneous connection for both irrigation and aspiration. One stopcock included.
- Reuse of silicone tube requires sterilization and replacement of stopcock.

DESCRIPTION	ITEM #
24Fr - 8mm OD, 2.5mm ID, 200cm (79in) NEW	BAL200
30Fr - 10mm OD, 2.5mm ID, 240cm (96in)	BAL240
30Fr - 10mm OD, 2.5mm ID, 300cm (120in)	BAL300
Replacement Stopcock (10 pack) RECOMMENDED	2400
Controlled Flushing Set - to administer flush aliquots from a bag rather than multiple syringes. - see page 96	CFS36

Non-Cuffed Endotracheal Tubes

- Silicone material - MRI compatible
- Radiopaque
- Stylet included
- Sterile
- Reusable (Ethylene Oxide sterilization recommended)

DESCRIPTION	ITEM #
1.0mm ID x 9.5cm tube with wire stylet	ETN10
1.5mm ID x 10cm tube with wire stylet	ETN15

Cuffed Endotracheal Tubes

- Silicone material - MRI compatible
- Sterile
- Reusable (Ethylene Oxide sterilization recommended)

DESCRIPTION	ITEM #
2.0mm ID, 4.0mm OD - 12Fr x 14cm (5.5in)	ETC20
7.0mm ID, 10.0mm OD - 30Fr x 55cm (22.5in)	ETC755
8.0mm ID, 11.3mm OD - 34Fr x 55cm (22.5in)	ETC855

10.0mm ID, 14.0mm OD - 42Fr x 55cm (22.5in)	ETC1055
11.0mm ID, 15.7mm OD - 47Fr x 55cm (22.5in)	ETC1155
12.0mm ID, 17.0mm OD - 51Fr x 55cm (22.5in)	ETC1255

Double Swivel Endotracheal Tube Connector with Capped Port, 15mm

Multi-axial rotation allows for patient adjustment and manipulation with reduced risk of ET tube movement while maintaining ventilation.

- Integrated access port facilitates bronchoscopy, BAL and suction without circuit disconnection.
- Maintains seal around scope during bronchoscopy procedure. Seal accepts bronchoscope diameters from 3.4 to 5.9mm.
- 360° Double Swivel Feature: Both the male and female 15mm connectors allow greater patient maneuverability between endotracheal tube and anesthesia circuit.

ITEM # SC15MM

Reinforced Endotracheal Tubes with Malleable Stylet

- Reinforced with embedded wire coils to provide safe, NON-KINKING airway regardless of patient position.
- Constructed of medical grade, non-toxic PVC material for easier placement.
- Malleable stylet included for increased rigidity and variable shape.
- Latex free
- High volume, low pressure cuff
- Radiopaque
- Fully transparent.
- Atraumatic bevel tip with lateral Murphy eye
- 15mm connector included

DESCRIPTION	ITEM #
2.5mm ID, 4.5mm OD - 13Fr x 19.5cm (7.6in)	ETC25R
3.0mm ID, 5.0mm OD - 15Fr x 20.5cm (8.1in)	ETC30R
3.5mm ID, 5.7mm OD - 17Fr x 22cm (8.7in)	ETC35R
4.0mm ID, 6.1mm OD - 18Fr x 23.5cm (9.3in)	ETC40R

8.0mm ID, 11.0mm OD - 33Fr x 36cm (14.2in)	ETC80R
8.5mm ID, 11.7mm OD - 35Fr x 36cm (14.2in)	ETC85R
9.0mm ID, 12.3mm OD - 37Fr x 36cm (14.2in)	ETC90R
9.5mm ID, 13.0mm OD - 39Fr x 36cm (14.2in)	ETC95R
10.0mm ID, 13.7mm OD - 41Fr x 36cm (14.2in)	ETC100R

Airway/ET Tube Exchange Catheter

- Intended for easier, atraumatic endotracheal tube exchange.
- Useful for oxygenating during fluoroscopy.
- 15mm adapter allows oxygen to be delivered temporarily. The adapter is removed in order to slide out the existing endotracheal tube and slide in the replacement tube.
- Centimeter markings for alignment with endotracheal tube markings
- Polished, atraumatic, open-ended catheter with side holes
- NOT for ventilating the patient.

DESCRIPTION	ITEM #	FITS ET TUBE SIZES:
8Fr x 80cm (32in)	ETE0880	larger than 3.0mm OD
10Fr x 80cm (32in)	ETE1080	larger than 4.0mm OD
10Fr x 150cm (60in)	ETE10150	larger than 4.0mm OD
15Fr x 80cm (32in)	ETE1580	larger than 6.0mm OD

Great addition
to your ventilator
patient supplies.

Silicone Cuffed Endotracheal Tubes - EXTRA LONG

The MILA Cuffed Silicone Endotracheal Tubes are appropriate for both oral and nasal intubation, as clinically decided. The inflated balloon cuff allows pressurized assisted ventilation by preventing gas loss.

- Medical grade, transparent silicone
- Murphy eye with beveled radiopaque tip
- Reinforced seal around balloon pilot lines for increased durability
- Ethylene Oxide sterilization recommended but can be autoclaved.
- Non-sterile
- Reusable
- Proximal fitting of the tubes accepts a 15mm adapter.

NEW!
Ideal for nasotracheal intubation
in equids and smaller camelids.

DESCRIPTION

ID 12mm, OD 17mm, Length 70cm (27.5in), 15mm connector
ID 14mm, OD 19mm, Length 70cm (27.5in) , 15mm connector

ITEM

ETCZ-12
ETCZ-14

- Item numbers with an "F" come with a universal, silicone funnel type adapter designed to fit all large animal breathing systems.

DESCRIPTION

ID 12mm, OD 17mm, Length 70cm (27.5in), Funnel hub
ID 14mm, OD 19mm, Length 70cm (27.5in), Funnel hub

ITEM

ETCZ-12-F
ETCZ-14-F

Atomizer / Throat Sprayer

Use to deliver atomized topical anesthetic into the upper airway to reduce sensation and reflexes that can be triggered by intubation, endoscopy, etc.

- 15Fr (4.7mm) tip x 6.5 inch (15cm) malleable, wire-reinforced tube for targeted deposition of medication.
- 5cc syringe is recommended for accurate dosing and proper pressure.
- Priming volume is 0.2ml.
- Use a 3ml syringe for a minimum forecast distance of 10cm upon exiting the sprayer tip under 25Kpa pressure to form an area of diameter of no less than 7cm.

ITEM # 5380

Large Animal Silicone Endotracheal Tubes with Distal End Sample Port

NEW!

The MILA Cuffed Silicone Endotracheal Tubes are used to deliver assisted ventilation and anesthetic gases. The inflated balloon cuff prevents gas loss during assisted ventilation. The sampling port provides access below the cuff for more accurate measurement of inhaled and exhaled gas concentrations when connected to a gas analyzer. See photo below.

- Medical grade, transparent silicone
- Funnel hub designed to fit almost all large animal breathing systems.
- Murphy eye with hole and beveled radiopaque tip
- Reinforced seal around sampling and pilot lines for increased durability
- Three sampling points below the cuff
- Tethered cap included on sampling port to keep clean and free of debris when not in use.
- Non-sterile
- Reusable (Ethylene Oxide sterilization recommended but can be autoclaved).

Three distal fenestrations for most accurate sampling of inspired and expired gases and fluid accumulated below the cuff.

Inflation Port and Pilot for Balloon Cuff

Funnel Hub designed to fit almost all large animal breathing systems.

Sampling Port for gas sampling with a capnograph or multi-gas analyzer.

Tethered Cap included on sampling port to close when not in use.

Cuffed with Obturator, and Inner Cannula

Recommended choice when size permits.

- Obturator
- Kits include:
 - » TWO Inner Cannulas with 15mm Connector
 - » Cap
 - » Brush
 - » Strap
- Cannulas allow for cleaning without removing the trach tube.
- The multiaxial flange on the outer cannula allows for increased patient comfort during movement.

Scan the QR code to see a demonstration.

NOTE: For Non-Cuffed with inner cannula, leave cuff deflated.

Epidural Pain Management Kit

- Catheter through tuohy needle introduction.
- Epidural catheter with wire stylet.
- 20Ga catheter is 90cm/36in, 24Ga catheter is 25cm/10in.
- Closed end with side holes.
- Length adjustable
- Kit includes catheter with wire stylet, Tuohy introducer needle, loss-of-resistance syringe, 0.2 micron bacteria filter, luer lock catheter clamp, suture wing, scalpel, drape and tape measure.

DESCRIPTION	ITEM #
24Ga catheter - 20Ga x 4.5cm (1.75in) tuohy needle	9243
20Ga catheter - 18Ga x 7.5cm (3in) tuohy needle	9203
20Ga catheter - 18Ga x 15cm (6in) tuohy needle	9206

See MILA website for YouTube video.

Tuohy Needle

Needle Tip (Top View)

Needle Tip (Side View)

Stimpod 450X

Universal handheld system designed to provide functionality for nerve location, with add-on cables for nerve mapping and neuromuscular blocking agent monitoring. See page 70 for details.

Diffusion Catheter/ Soft Tissue Incision Catheter for Pain Management

- Radiopaque polyurethane catheter with micro ports in the distal end to evenly disperse fluid over 2 inches, 4 inches, 6 inches, 7.5 inches or 9 inches.
- Designed to deliver local anesthetics to the surgery site for several days.
- Surgically place in the deepest layer of closure, or by using a 5Fr (#4205 or 4205.5) peel-away introducer for wounds.
- Ideal for amputation incisions, traumatic wounds, mammary strips, total ear canal ablation and thoracic/sternal surgery.
- Use with the MILA administration pump (see page 89), a syringe or IV pump for continuous infusion.

DESCRIPTION	ITEM #
2in (5cm) Dispersion Area Catheter size: 16Ga x 11cm (4.5in)	DIFF2
4in (10cm) Dispersion Area Catheter size: 16Ga x 30cm (12in)	DIFF4
6in (15cm) Dispersion Area Catheter size: 16Ga x 30cm (12in)	DIFF6
7.5in (18cm) Dispersion Area Catheter size: 16Ga x 30cm (12in)	DIFF7
9in (22.5cm) Dispersion Area Catheter size: 16Ga x 30cm (12in)	DIFF9
.2 Micron Filter Individually packed / sterile (10 pack)	2420

Opioid-free soft tissue pain management.

Closed Medication System

Protect Veterinary
Healthcare Personnel

Safe, Simple and Economical. The MILA Closed System Transfer Device is designed to fully protect veterinary healthcare personnel from exposure to hazardous drugs. The system is designed for safe handling of hazardous injectable drugs while optimizing safety, simplicity and the cost of care. The use of a closed system transfer device in conjunction with other safety precautions is the standard for preparing, transporting, administering and disposing of hazardous drugs.

The system includes a Closed Vial Access Adapter, Closed Male Luer Valve, Closed Female Luer Valve and Infusion Access Device Spike and meets the following standards:

- US FDA 510(k) clearance under ONB Product Code (Closed System Transfer Devices)
- Mechanically prohibits the release of drugs in vapor, aerosol or liquid form during preparation and administration.
- Prevents the introduction of microbial and airborne contaminants into the drug or fluid path.
- Substantiated to prevent microbial ingress for up to 7 days.

Closed Vial Access Adapter

- Functions as a pressure equalization device, utilizing a sealed expansion chamber that establishes and maintains neutral pressure when air or diluent is injected into or aspirated from the vial.
- Connects to 13mm and 20mm vials. Permanently locks on to the vial to prevent disconnection and reduces exposure.
- Use any luer lock syringe to access the vial. No need to prime syringe with non-filtered air.
- Drip free connection
- Multi-use
- 0.10ml priming volume

Next generation product is yellow to indicate hazardous drugs combined with pending advanced efficacy claims in accordance to USP800.

Closed Male Luer Valve

- Connects to any luer lock syringe. Permanently locks on to the syringe to prevent disconnection and reduces exposure.
- Passive safety system that locks and closes the fluid path upon disconnection from vial adapter.
- Drip free disconnection
- Simple permanent locking feature prevents disconnection and reduces exposure.
- 0.06ml priming volume
- Single Use

Item #12-007

Closed Female Luer Valve

- Needle-free female luer connects onto any butterfly needle or catheter. Designed to reduce exposure after drug infusion.
- Drip free disconnection
- 0.06ml priming volume
- Single Use

Item #12-004

Swabable

Infusion Access Device Spike with Closed Female Luer

- Use with standard IV bags, glass bottles and other rigid containers.
- IV spike with closed female luer for adding chemo drugs to bag or bottle
- Drip free disconnection
- Single Use

Item #12-008

Swabable

Closed System Transfer Device - From Vial to Syringe

How it Works:

Snap on vial adapter.

Connect male luer valve onto syringe.

Connect male luer valve to female luer valve on vial adapter and withdraw medication.

Disconnect syringe from vial adapter.

Connect female valve onto the patient's vascular device.

Connect syringe with male valve (12-007) onto female valve (12-004). Administer drug.

Disconnect syringe and dispose.

Closed System Transfer Device - From IV Bag to Syringe

How it Works:

Spike fluid bag with access device.

Pull cap back from bottom of access device and spike with administration set.

Connect male luer valve onto syringe. Fill syringe following directions in left column on this page.

Connect male luer valve to female luer valve on access device and infuse medication into bag.

Disconnect syringe and dispose.

IV Administration Set with Two Injection Sites and Check Valve	175255

Fecal Management System

FOR COLLECTION OF LIQUID STOOL AND ODOR CONTAINMENT

The Fecal Management System is a 20Fr, 24Fr or 28Fr soft silicone catheter inserted into the rectum for collection of liquid stool. It is retained by an air-inflated low pressure balloon. The proximal end of the large bore tube attaches to a 2000ml collection bag.

- Catheter size is determined by the size of the patient:
 - 20Fr for small and medium size dogs.
 - 24Fr for medium and large size dogs.
 - 28Fr for extra large dogs.
- Balloon size is determined by approximating the normally formed stool size.
- Reduces infection risk to other animals and humans.
- Measurement lines help to calculate fluid losses.
- Greatly reduces clean up time and supplies.
- Keeps odor contained.

DESCRIPTION	ITEM #
20Fr catheter, extension line, 1 2000ml collection bag	FM2000
24Fr catheter, extension line, 1 2000ml collection bag	FM2400
28Fr catheter, extension line, 1 2000ml collection bag	FM2800
2000ml Replacement Bag	FMRB

Closed System Urine Collection Kits 600ml, 1000ml and 2000ml

DESIGNED TO MINIMIZE CATHETER ASSOCIATED URINARY TRACT INFECTIONS.

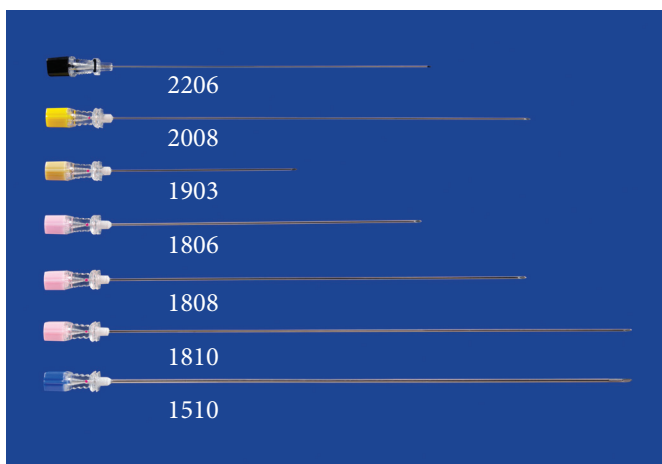

DESCRIPTION	ITEM #
600cc closed system including 600cc collection bag with anti-reflux valve and twist drain, 72in (180cm) lightweight collection line with 360° spinner luer lock, injection/sampling port and female luer lock barbed adapter.	UC600K
1000cc closed system including 1000cc collection bag with anti-reflux valve and twist drain, 72in (180cm) lightweight collection line with 360° spinner luer lock, injection/sampling port and female luer lock barbed adapter.	UC1000K
2000cc closed system including 2000cc collection bag with anti-reflux valve and push/pull drain, 72in (180cm) collection line, injection/sampling port, non-wettable air filter and integrated barbed adapter.	UC2000K

Spinal Needles

Spinal needles with marked and notched hub for easy tip orientation.

DESCRIPTION	ITEM #
22Ga x 15cm (6in)	2206
20Ga x 20cm (8in)	2008
19Ga x 8.75cm (3.5in)	1903

20Ga x 8.75cm (3.5in)	T2035
18Ga x 8.75cm (3.5in)	T1803
18Ga x 15cm (6in)	T1806

Echogenic Needles for Ultrasound

Echogenic needles feature 360° dimple reflectors located at the distal end that create a more defined ultrasound image from any angle without compromising puncture characteristics.

NERVE BLOCK NEEDLES

- Use for nerve block injections.
- Clear needle tip visualization under ultrasound for safe and precise needle placement.
- Needle bevel is 30° back-cut.

DESCRIPTION	ITEM #
21Ga x 8cm (3.125in)	E2103
21Ga x 10cm (4.0in)	E2104

MSK/SPINAL NEEDLES

- Use for musculoskeletal and spinal injections.
- Clear needle tip visualization under ultrasound for safe and precise needle placement.
- Needle bevel is Quincke style.

DESCRIPTION	ITEM #
20Ga x 20cm (8in)	E2008
18Ga x 15cm (6in)	E1806
18Ga x 20cm (8in)	E1808

Olive Tip Needles

LACRIMAL LAVAGE NEEDLE

- Used to flush and lavage eyes and the lacrimal duct.
- Stainless steel needle with small atraumatic olive tip.
- Female luer designed to fit any syringe.

DESCRIPTION	ITEM #
30Ga x 2.5cm (1.0in)	OT3025
23Ga x 2.0cm (0.75in) Stepped	OT2320
23Ga x 2.0cm (0.75in) Curved	OTC2320
23Ga x 3.0cm (1.25in)	OT2330
23Ga x 3.0cm (1.25in) Curved/Stepped	OTC2330

URINARY & ANAL GLAND LAVAGE NEEDLE

- Used to flush anal glands or distal end of feline penis.
- Stainless steel needle with small atraumatic olive tip
- Female luer designed to fit any syringe.
- Reusable

DESCRIPTION	ITEM #
21Ga x 1.3cm (0.5in)	OT2113
21Ga x 2.5cm (1.0in)	OT2125
21Ga x 4.0cm (1.5in)	OT2140

Eye Lavage Kit/SPL

- Can be placed in upper or lower lid.
- Single stick insertion method
- Soft, non-irritating disk and tubing
- Allows application of liquid eye medication away from the site.
- Easily used in both clinical and farm setting.
- Kit includes 12Ga straight or 10° angled trocar, 20Ga catheter, eyelid lifter, extension set, luer lock adapter, tongue depressor for taping the proximal end, catheter for medication infusion, stasis valve and stemless cap.
- Repair kit (#6615) includes 20in/50.8cm tubing, cannula for connecting tubes, 20Ga catheter, tongue depressor for taping the proximal end, stasis valve and stemless cap.
- Use the elastomeric administration pump (Item #7100 on next page) for continuous infusion.

DESCRIPTION	ITEM #
Subpalpebral Eye Lavage Kit 60in/152.4cm catheter	6612
Subpalpebral Eye Lavage Kit Angled 10° trocar, 60in/152.4cm catheter	6613
Repair Kit	6615

For Ophthalmic Surgical Drape, see next page.

Lower Lid
Insertion

Elastomeric Pump

- 100ml fluid reservoir - Minimum fill volume = 15ml, Residual volume = 2ml
- Four layers of latex for sturdiness
- Recoil of balloon pushes fluid through tubing.
- Two flow control tubes are included:
 - FCT12 (0.8ml/hr) is attached to pump.
 - FCT4 (2.5ml/hr) is included in package.
- Accuracy rate +/- 15%

DESCRIPTION	ITEM #
Elastomeric Pump	7100
10ml in 4 hours - 2.5ml/hour	FCT4
10ml in 12 hours - 0.8ml/hour	FCT12
.2 micron filter (10 pack)	2420

23Ga x 3.0cm (1.25in) Curved/Stepped	OTC2330

Ophthalmic Surgical Drape - Customizable

Quick and easy sterile field that stays in place without clamps.

Use for maintaining a sterile field.

- Size 60cm x 60cm (24in x 24in)
- Rectangle adhesive area in center - 12cm (5in) x 15cm (6in)
- NO APERTURE. This allows the surgeon to customize the cut, as needed.
- Superb translucent film, impervious to fluids
- Optimal drapeability

Uterine Flush

Embryo Flushing Catheter

- Open-end silicone catheter
- Balloon ensures occlusion of the cervix when inflated and allows for the retention of fluid in the uterus.
- Ideal for embryo transfer.
- Y-adaptor tube assembly includes line to fluid source, drain line and graduated adapter line to catheter.
- Reusable

DESCRIPTION	ITEM #
36Fr x 80cm (32in) catheter with 100cc balloon cuff	UFC3680

BELOW: Item #175490 connected to Item #UFC3680 for embryo wash.

Uterine Flush Tube

- 28Fr x 190cm flushing tube with spike
- 4 side holes, 1.5cm apart, ending 2.5cm from end of catheter
- Smooth, open-ended tip

DESCRIPTION	ITEM #
28Fr x 190cm (75in)	UFT28190

High Flow Fluid Transfer Set

Attach to flushing catheter for uterine flush (see photo on the left). Includes high flow spike, clamp, and barbed adapter for 20-40Fr tubes.

DESCRIPTION	ITEM #
Length 30cm (12in)	175490
Length 60cm (24in)	175493

Equine Oocyte Collection Set

- For equine transvaginal oocyte collection.
- Laminar flow. No ridges on collection side.
- Aspiration needle is 12Ga x 60cm (24in), stainless steel, double lumen, with an ultra sharp tip.
- Etched needles are ECHOGENIC to improve ultrasound visualization.
- Double lumen needle design consists of an outer needle and inner cannula. This allows for easy cleaning and replacement of the outer needle as needed.
- Flushing and collection lines are 14Ga x 180cm (72in) PVC attached to a ‘Y’ adapter.
- #6 silicone bottle stopper with collection port and vent port

DESCRIPTION	ITEM #
Oocyte Collection Set - Etched Tip Includes 12Ga needle assembly, flushing and collection lines and bottle stopper assembly	OCS 
Outer Replacement Needle - Etched Tip 12Ga x 60cm	OCRN 
Oocyte Collection Set - Non-Etched Tip Includes 12Ga needle assembly, flushing and collection lines and bottle stopper assembly	OCS-2
Outer Replacement Needle - Non-Etched Tip 12Ga x 60cm	OCRN-2
Replacement Lines Includes Y-port with attached flushing and collection lines	OCRL
Stopper Assembly Includes #6 silicone stopper with collection and vent ports	OCSA

Tracheal Wash / Aspiration Catheters

Single Lumen Catheters

Single lumen catheter with female luer lock for medication delivery and sampling at any site accessible by endoscope. To maintain sterility during advancement, these sets contain a water soluble plug in the distal end.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
2.3mm OD x 190cm (76in)	2.5mm	EDC190
1.8mm OD x 200cm (79in)	2.0mm	EDC200
2.3mm OD x 220cm (88in)	2.5mm	EDC220
2.3mm OD x 400cm (160in)	2.5mm	EDC400

Double/Triple Lumen Catheters

Two and three lumen sampling catheters enable a sterile specimen retrieval via an endoscope. To maintain sterility during placement, the outer catheter has a glycol plug in the tip. Once in place, the inner catheter is advanced, pushing out the glycol plug, then further advanced for retrieval of the sterile specimen.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
Two stage catheter 1.8mm OD x 190cm (76in)	2.0mm	EMAC700
Two stage catheter 1.8mm OD x 250cm (100in)	2.0mm	EMAC700L
Triple stage catheter 2.3mm OD x 190cm (76in)	2.5mm	EMAC800

Lance-A-Lot

Ideal for
lancing and injecting
Ethmoid Hematomas and
Uterine Cysts.

Injection and aspiration needle with female luer lock.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
1.8mm OD x 190cm (76in) with 19Ga needle	2.0mm	LAN180
2.3mm OD x 190cm (76in) with 17Ga needle	2.5mm	LAN190

Indwelling Guttural Pouch Flushing Kit

- Non-irritating polyurethane catheter for extended treatment of the guttural pouch.
- Placed by viewing the guttural pouch through an endoscope up one nostril and advancing the catheter introducer up the other nostril.
- Kit includes:
 - » Catheter with coils
 - » Bendable introducer
 - » Luer lock adapter
 - » Glue (to attach luer to catheter)
- The catheter can be left in for days, secured to the halter and protected by a grazing muzzle.
- Catheter dimensions: 12Ga x 135cm (54 Inches)
Catheter can be cut to desired length.

DESCRIPTION	ITEM #
Catheter Kit	9500
Catheter Only	9510

Cytobrush – Protected

- Designed to collect tissue samples from the bronchi or upper and lower gastrointestinal tracts.
- Tube-within-a-tube design. The outer tube has a water soluble glycol plug in the distal end to protect the inner lumen brush from contamination as it travels through the endoscope channel. When the sample site is reached, the forward motion of the inner tube safely expels the plug and deploys the brush. After sample collection, the brush is retracted into the outer tube, and removed from the scope channel.
- 10mm bristled brush with outside diameter of 2mm and radiopaque distal end cap.
- Handle with ring provides easy deployment and retraction of brush.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
1.8mm x 180cm (72in)	2.0mm	CYT180

Laparoscopic Large Animal Retrieval Pouch

- Retrieval pouch for a variety of large animal surgical procedures.
 - Ovariectomies with normal ovaries and granulosa cell tumors.
 - Removal of cryptorchid testicle, bladder stones, abdominal cavity tumors.
 - Harvesting biopsy specimens.
- 1500ml bag detaches from metal cage.
- Economical

ITEM #	EP810
--------	-------

See 2017 publication: milainternational.com/pub/media/wysiwyg/Retrieval_Pouch-Large_Animal.pdf

Fetcher™ Endoscopic Retrieval Device

The MILA Fetcher™ Endoscopic Retrieval Device can be placed down the channel of an endoscope for extraction of foreign bodies such as buttons, marbles, hairballs, grass, golf balls and stones.

- Fully open basket has a diameter of 40mm (1.6in) and length of 90mm (3.5in).
- Basket is constructed of 6 monofilament nitinol wires.

DESCRIPTION	SCOPE CHANNEL SIZE	ITEM #
2.3mm OD x 235cm (92.5in)	2.8mm	ERD-235

Fluid Collection and Delivery

High Flow IV Administration Sets

DESCRIPTION	ITEM #
High flow, large bore set includes drip chamber, 180cm (72in) tubing, pinch clamp, needle-free injection site and spin luer lock. 12 drops/ml Priming Volume = 42ml	175497

DESCRIPTION	ITEM #
High flow, large bore set includes vented spike with filter, 180cm (72in) tubing, pinch clamp, needle-free injection site and spin luer lock. Priming Volume = 32ml	175498

EquiSet IV Administration Set

DESCRIPTION	ITEM #
High flow, large bore (30Fr x 300cm/120in), non-vented Y-set with 2 spikes, 3 clamps, roller flow adjustment, spin luer lock adapter and needle-free injection port. Economical	8V0002

Arthroscopy Fluid Line Wound Flushing Line

DESCRIPTION	ITEM #
High flow, large bore infusion set includes vented spike, 305cm (120in) of tubing, clamp and spin luer lock. Fits most peristaltic pumps. Priming Volume = 48ml	175499

10 Drop IV Administration Set

DESCRIPTION	ITEM #
Universal spike, 224cm (88in) tubing, roller clamp, slide clamp, one injection site located 28cm (11in) above distal end and a spin connector Priming volume = 25.6ml, 10 drops/ml	175250
Universal spike, 261cm (103in) tubing, roller clamp, slide clamp, two injection sites located 23cm (9in) and 221cm (87in) above distal end, check valve and spin connector Priming volume = 28ml, 10 drops/ml	175255

15 Drop IV Administration Set

DESCRIPTION	ITEM #
Administration set with vented spike, 190cm (76in) tubing, drip chamber, rotating luer lock, roller clamp and injection site. Replacement for the discontinued BD15 Drop Set. Priming Volume = 13.3ml	175278

Pressurization Set

DESCRIPTION	ITEM #
T-shaped spike with 48cm (19in) extension set, female luer, air filter and check valve	AF48
Squeeze Bulb Assembly to pressurize IV bag Includes bulb and three-way stopcock	175590

Increase flow rate by pressurizing with FILTERED AIR into a bag or bottle. Includes spike and extension set with air filter. Allows medication administration into and fluid withdrawal from the bag or bottle.

Fluid Collection and Delivery

Controlled Flushing Set

- **Eliminates the need to pre-fill syringes.**
- Set includes vented bag spike, 90cm (36in) tubing and bi-directional valve.
- Use for various flushing needs - BAL, joint, ear, wound, ovum pickup.
- The bi-directional valve allows for repeat aspiration from the bag and controlled flushing without opening the system.
- Spike the irrigation fluid, attach syringe to female luer of valve, fill syringe, flush, then repeat.

ITEM # CFS36

Secondary Venoset

DESCRIPTION ITEM #
 Deliver a small amount of medication quickly. This set allows pressurization when used with squeeze bulb (Item #175590 on next page) of a bag or bottle. Replacement for the discontinued Abbott secondary venoset.
 Priming Volume = 4ml
 Tubing length is 58cm (23in) 175720

Fluid Control Dial

DESCRIPTION ITEM #
 Easily adjust infusion rate from 10ml/hour up to 350ml/hour when used with a gravity system. When used with a pressurized system, flow is four times faster. Tube length is 45cm (18in)
 Priming volume = 3ml 175480

High Flow Fluid Transfer Set

Attach to flushing catheter for uterine flush. Includes high flow spike, clamp, and barbed adapter for 20-40Fr tubes.

DESCRIPTION ITEM #
 Length 30cm (12in) Priming volume = 8ml 175490
 Length 60cm (24in) Priming volume = 20ml 175493

Fluid Transfer Set

DESCRIPTION ITEM #
 High flow spikes to transfer fluid between bags
 Tubing length is 45cm (18in) FTS18

Fluid Collection and Delivery

Pressure Infusers

High performance pressure infuser facilitates rapid high volume fluid boluses by continuously squeezing the IV fluid bag.

- Provides easy view of fluid bag and fluid level.
- Special built-in hook allows fluid bag to be replaced without removing pressure infusor from hanging device.

DESCRIPTION	ITEM #
1000ml cuff with squeeze bulb, pressure manometer and 3-way stopcock	175500
3000ml cuff with squeeze bulb and manometer	175930
5000ml cuff with squeeze bulb and manometer	175950
Pressurization Squeeze Bulb Assembly Includes bulb and three-way stopcock	175590

Bag / Bottle Pressurization and Air Filtration Kit

- T-shaped spike with 48cm (19in) extension set, female luer, air filter and check valve
- Increases flow rate of an IV or blood set by pumping FILTERED AIR into the bag or bottle when used with the pressurization squeeze bulb (Item #175590 above).
- Allows medication administration into, and fluid withdrawal from, the bag or bottle.

DESCRIPTION	ITEM #
T-shaped spike with 48cm (19in) extension set, female luer, air filter and check valve.	AF48

Blood Filtration & Administration Sets with 200 Micron Filter - Small Animal and Large Animal

Ideal for delivery of aliquots of whole blood, red cells and platelets, cellular components and fresh-frozen plasma for transfusion and autotransfusion.

High-Flow Blood Administration

- Large bore tubing for HIGH FLOW blood administration.
- Set includes spike, drip chamber, tubing, roller clamp, 200 micron blood filter, needle-free injection port and SPINNER luer lock.
- Total length is 203cm (80 inches).
- Priming Volume is 36ml.
- Filtration Area: 16 square centimeters
Volume limit depends on a variety of factors such as blood density and transfusion pressure.
- Flow rates can be increased using pressurization kit, item number AF48 (on next page).

ITEM #	BF200-2
--------	---------

Syringe Administration

- Large bore tubing.
- Set includes female luer, tubing, 200 micron blood filter, pinch clamp and SPINNER luer lock.
- Total length is 43cm (17 inches).
- Priming Volume is 4ml.
- Filtration Area: 16 square centimeters. Volume limit depends on a variety of factors such as blood product density and transfusion pressure.

ITEM #	BF200-3
--------	---------

Bag Administration

- Large bore tubing.
- Connect to MILA Automatic 3-way set (on next page) to make a completely closed delivery system.
- Good for AUTOTRANSFUSION. Refer to Pigott study (article named below). See next page for suggested kits.
- Set includes non-vented spike, tubing, pinch clamp, 200 micron blood filter and female luer lock.
- Total length is 47cm (18 inches).
- Priming Volume is 3ml.
- Filtration Area: 16 square centimeters.
- Volume limit depends on a variety of factors such as blood product density and transfusion pressure.

ITEM #	BF200-4
--------	---------

Miller, V. and Pigott, A. (2020) Traumatic haemothorax in a dog managed without surgery using a guidewire-inserted chest tube and a single closed system for collection and administration of autotransfusion. *Veterinary Record Care Reports*, 8:e001142

Ideal in large animal applications to filter and administer blood from a bag.

BF200-2

Gravity flow rates (not pressurized) using simulated blood:

No Catheter = 710ml/minute
 MILA 14Ga x 5.25 inch Catheter = 180ml/minute
 MILA 12Ga x 5.25 inch Catheter = 375ml/minute
 MILA 10Ga x 5.25 inch Catheter = 475ml/minute

Ideal to filter and administer blood from a syringe.

BF200-3

Ideal when needing to draw and filter blood from a bag into a syringe.

BF200-4

175440

BF200-4 connected to blood bag and 175440 to evacuate quickly and safely into a syringe.

BF200-4

Pressurization Set

Increase flow rate by pressurizing with FILTERED AIR into a bag or bottle. Includes spike and extension set with air filter.

DESCRIPTION	ITEM #
Pressurization Kit	AF48
Pressurization Squeeze Bulb Assembly Includes bulb and three-way stopcock	175590

Automatic 3-Way Set for Transfusion/Autotransfusion

Unique valve allows aspiration and evacuation without disconnecting the syringe and without turning a stopcock. Choose a kit from the list below and attach #BF200-4 to create a closed, automatic delivery system. Valve does not induce hemolysis.*

DESCRIPTION	ITEM #
Centesis Adapter with Spin Luer Lock	175440
Centesis Adapter with total Length 12.5cm	175450
Centesis Adapter with total Length 40cm	175460

*Data on file at MILA.

Blood Filtration System

Hemo-Nate Blood Filter - 18 Micron

- Stainless steel filter designed to filter particulate within blood products down to 18 microns.
- Used for the filtration of stored blood transfused into small patients.
- Luer locking hub allows the use of a standard syringe without a needle.
- 50cc filter capacity for whole blood and 20cc filter capacity for all other blood components.

DESCRIPTION	ITEM #
Hemo-Nate Blood Filter - 18 Micron	BF18

Hemo-Tap Bag Spike

- Hemo-Tap bag spike with needle injection port.

DESCRIPTION	ITEM #
Hemo-Tap Bag Spike	BF15

Blood Collection Set

High flow collection set attaches directly to the venous catheter and vacutainer bottle.

- Set includes 72in (180cm) large bore tubing, injection site, drip chamber and spin luer lock.
- Priming volume = 42ml

ITEM #	175484
--------	--------

Equine Joint Infusion Kit

- Provide continuous localized infusion of antibiotics directly into the affected joint.
- A crush resistant 5Fr (16Ga) catheter is inserted using a 6Fr (14Ga) peel-away introducer.
- The lightweight administration pump will hold up to 100ml.
- Kit includes:
 - 100ml administration pump
 - 5Fr (16Ga) crush resistant catheter
 - 6Fr (14Ga) peel-away introducer
 - Two flow control tubes:
 - FCT12 (0.8ml/hr) is attached to pump.
 - FCT4 (2.5ml/hr) is included in package.
- Accuracy rate +/- 15%
- Minimum fill volume = 15ml
- Residual volume = 2ml

DESCRIPTION	ITEM #
Joint Infusion Kit	9100
10ml in 4 hours – 2.5ml/hour	FCT4
10ml in 12 hours – 0.8ml/hour	FCT12

See MILA website for detailed insertion instructions written by Stephen B. Adams DVM, MS and Timothy B. Lescun, BVSc.

Large Animal Trans-Tracheal Wash Kit/TTL

Catheter-over-needle insertion method through the skin into the trachea. The semi-rigid flushing catheter has a stylet and luer adapter. The flushing catheter is packaged in a protective sleeve to allow aseptic handling without a glove.

DESCRIPTION	ITEM #
10Ga x 2.25in steel introducer with sheath with 12Ga x 70cm (28in) flushing catheter for horses and foals	TW1228
14Ga introducer with 16Ga x 70cm (28 in) flushing catheter for large dogs and neonatal foals	TW1628

INTRODUCERS are 10Ga or 14Ga.

Small Animal Trans-Tracheal Wash Kit/TTL

Catheter-over-needle insertion method. The semi-rigid flushing catheter has a stiffening stylet and luer adapter. The flushing catheter is packaged in a protective sleeve to allow aseptic handling.

DESCRIPTION	ITEM #
Medium Sized Dog - 16Ga x 41cm (16in) flushing catheter with 14Ga introducer	TW1616
Large Dog - 16Ga x 70cm (28in) flushing catheter with 14Ga introducer	TW1628

Large Animal Bronchoalveolar Lavage Catheter (BAL)

- Open-end, silicone, radiopaque, heavy wall tube for lavage via the nasotracheal route.
- Distal 30cc balloon cuff can be inflated to prevent retrograde fluid flow around the tube and help stabilize the placement.
- Two-way fitting allows simultaneous connection for both irrigation and aspiration. One stopcock included.
- Reuse of silicone tube requires sterilization and replacement of stopcock.

DESCRIPTION	ITEM #
24Fr - 8mm OD, 2.5mm ID, 200cm (79in) NEW	BAL200
30Fr - 10mm OD, 2.5mm ID, 240cm (96in)	BAL240
30Fr - 10mm OD, 2.5mm ID, 300cm (120in)	BAL300
Replacement Stopcock (10 pack) RECOMMENDED	2400
Controlled Flushing Set - to administer flush aliquots from a bag rather than multiple syringes. - see page 96	CFS36

Accessories and Components

Barbed Connectors

Each individually packed and sterile.

DESCRIPTION	ITEM #
Dual End Barbed Adapter 4-12mm	2300 (10 pack)
Dual End Barbed Adapter Small end 4.0-6.0mm Large end 7.5-11.5mm	2320 (10 pack)
Female luer lock barbed adapter for foley catheter that accepts 20-40Fr tubes	2350 (10 pack)
Female luer lock adapter accepts 11-22Fr tubes	2360 (10 pack)
Male luer lock connector for 11-22Fr tubes (Ideal for oxygen)	2370 (10 pack)
Male luer lock barbed adapter accepts 20-40Fr tube	2380 (10 pack)

.2 Micron Bacteria Filter

Each individually packed and sterile.

- Surface area: 5 square centimeters.
- Volume limit depends on bacteria burden of liquid being filtered.

DESCRIPTION	ITEM #
0.2 Micron Bacteria Filter with male and female luer locks.	2420 (10 pack)

Connectors

Each individually packed and sterile.

DESCRIPTION	ITEM #
Female to Female Luer Connection	2440 (10 pack)
Male to Male Luer Connection	2445 (10 pack)
Three female connectors with a male rotating luer lock.	2460 (10 pack)

Caps

- Tethered Cap (8090) attaches to the catheter or extension hub to cover the injection port. Not for stasis valves or MicroClaves® because it has a stem that keeps the valve open.
- Stemless Luer Lock Cap (8099) 10 pack, non-sterile. Keeps injection ports clean without opening the valve. Works with all injection ports, including stasis valves.

DESCRIPTION	ITEM #
Tethered Cap	8090
Stemless Luer Lock Cap	(10 pack) 8099

Stopcocks

Each individually packed and sterile.

DESCRIPTION	ITEM #
Three-way with luer slip	2400
	(10 pack)
Three-way with luer lock	2405
	(10 pack)
Three-way with 8 inch extension	2408
Four-way with High Flow Needle-Free Valves	2412

Suture Wings

Suture wings are sold in packs of 10, non-sterile.

DESCRIPTION	10 PACK	ITEM #
20Ga with blue clamp		2530
18Ga with blue clamp		2540
16Ga with blue clamp		2550
14Ga with blue clamp		2560
7Fr with blue clamp		2570
8Fr with blue clamp		2572
9Fr translucent		2575
14Fr translucent		2580
18Fr translucent		2590

Centesis Adapters/Automatic 3-Way

DESCRIPTION	ITEM #
Centesis Adapter with Spin Luer Lock	175440NB
Centesis Adapter with total Length 12.5cm	175450NB
Centesis Adapter with total Length 40cm	175460NB

For Automatic 3-Way kits, see pages 68-69.

Guidewires

DESCRIPTION	ITEM #
0.018in x 45cm guidewire with one soft flexible 'J' end and one soft flexible straight end	GW1845
0.018in x 50cm Hydrophilic coated nitinol wire with steerable tip	GW1850N
0.021in x 70cm Hydrophilic coated nitinol wire with steerable tip	GW2170N
0.035in x 80cm Hydrophilic coated nitinol wire with steerable tip	GW3580N
