2023
Catalogue

www.**manomedical**.com

Dear Partner,

Here is the new version of our catalogue with of course products you already know but also new ones we are happy to introduce.

We always try to bring you a portfolio of technical products which are practical and efficient solutions for our Vet customers in many fields such as Imaging, Surgery, Monitoring – Diagnostic, Cure and Care... But we are also always open to discuss about your specific needs to find the best shared solutions.

Beyond the equipment, all our team (commercial, technical, administrative) is dedicated to give you the best support with reactivity and perceptiveness. We all are involved in giving you the best service and making our partnership fluid and productive.

Whatever you are looking for, feel free to contact Rémy FRÉJAVILLE, our Export Manager.

Thank you for your trust and loyalty.

Denis CATINAUD, DVM
Quality & Marketing Director

Mano Médical products

Laser Therapy

LaserFlex LT 16

FREE SOFTWARE UPGRADE!

ADAPTED TO CARES AT THE CLINIC AND IN THE FIELD

ERGONOMY :

- Battery operated
- Soundless
- 7'' large touchscreen
- Small and lightweight (2.2 kg)

Long life battery

10 years warranty on diodes

ULTRA MOBILITY!

Laser Therapy

SIMPLICITY:

- Simple and intuitive display
- Power Pulse mode up to 16W
- 3 different tips for many indications

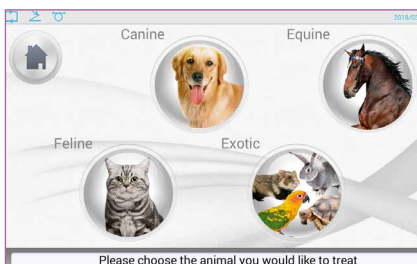

LOTS OF PROTOCOLS ADAPTED TO SPECIES AND ANATOMICAL PARTS

TYPICAL APPLICATIONS IN VETERINARY MEDICINE:

- Acute (post-trauma) or chronic (arthritis...) pain treatment
- Post-surgical or trauma wound healing promotion
- Inflammatory symptom reduction
- Muscle and ligament trauma reduction
- Dental abscesses and gingivostomatitis healing

Access to all our former webinars for free!

INFUSION PUMP
ManoPump iV1

For safe and precise administration!
- Small and light (1.45 kg)
- **Kennel mount and IV stand support included**
- High-performance battery (up to 10 hours run time)
- Large touchscreen (4.3'' -10.75 cm) for a clear display of parameters including infusion time left
- Many settings available such as:
  - ✓ Overall infusion volume
  - ✓ Requested flow
  - ✓ Infusion total time
- High sensitivity of settings (bubbles and occlusion pressure)
- **Transfusion compatible**

NEW!

SYRINGE PUMP
ManoPump SP1

NEW!

- Automatic recognition of syringe sizes (5, 10, 20, 30 and 50/60 ml)
- Large touchscreen (4.3'' -10.75 cm) for a clear display of parameters
- Multi-function operation with 3 modes: ml/h (time, rate mode), body-weight mode and micro mode

HEATING MAT
Carbon Tech V1

100% Efficient, 100% Secure!

- High density carbon fabric
- Specifically designed for even heat distribution
- Smooth and comfortable structure
- Target temperature obtained in less than 5 minutes
- Designed to maintain the appropriate temperature for a long period

WARRANTY 5 YEARS AGAINST SCRATCHES AND BITES

Available in 2 sizes:
Cage model: 52 x 62 cm (+/- 1 cm)
Power: 25W
Table model: 52 x 112 cm (+/- 1 cm)
Power: 50W

▼
EFFICIENT RELIABLE SAFE

Heating Mat

• Carbon Tech V2

Top grade comfort and safety for the patient and for the user!

▸ Effective warming
▸ Even heat distribution
▸ Easy to clean and easy to desinfect
▸ Low maintenance costs
▸ Energy efficient: 50 Watts only!
▸ Waterproof
▸ Environmentally friendly

Cage model: 52x62 cm (Power: 25W)

WARRANTY 5 YEARS AGAINST SCRATCHES AND BITES

Ask for our hypothermia management guide!

Table model: 52x112 cm
(Power: 50W)

CarbonTech V2 advantages:

• Safe temperature regulation (integrating a sensor and a high accuracy limiter not exceeding 42°C-107.6°F)
• 3 power levels (50%, 80% and 100%)
• Safety shutdown after 12 hours of use
• Disconnectable power block

VETERINARY DOPPLER

Vet BP

Blood pressure measurement, monitoring, small animals' examination

Including 4 cuffs in different sizes, 1 blood pressure probe, battery charger, sphygmomanometer, headset and tube of gel

2 optional probes:
- Pencil probe for easy exotic animals' examination ① (option)
- Transesophageal probe for use on anesthetized animals as a cardiac monitoring solution (option) ②

①

②

OXYGEN CONCENTRATOR

VetOxyFlow OC1

Prohibit water

NEW!

The output pressure superior to most of other devices on the market allows to provide oxygen efficiently to all types of anaesthesia machines

▸ Fully automatic
▸ Easy operation
▸ Compact and silent
▸ Easy maintenance

Oxygen: ≥ 93%
Flow rate: 0-5 l/min
Sound level: 45 dB
Weight/Dimensions : 22 kg/ 49x27x56 cm

Mano Médical
Medical equipment for veterinarians

VETOXYFLOW OC1

Exclusive distribution

PetMAP™

The Blood Pressure Lead Solution!

Convenient, Easy to use, Accurate and Profitable

▼
DIAGNOSIS

PetMAP™ g3

- Systolic and diastolic blood pressure
- Mean arterial blood pressure (MAP)
- Heart rate
- Correlated with intra-arterial blood pressure
- Proven petMAP technology with PPO (petMAP Proprietary Optimizations)
- Real-time display of oscillometric envelope
- Tabular display of readings and NSV (Nominal session value) in clinic
- Graphic display of last 45 readings in OR
- Easy tu use «no menu» touch screen display

Exclusive Distribution

All the PetMAP™ include 7 cuffs in different sizes (2 - 2.5 - 3 - 3.5 - 4 - 4.5 and 5.5 cm)

Options:
- Larger cuffs : 6.5 - 8 - 10 and 13 cm
- Protective cover
- Pole and table mounts

DIAGNOSIS MONITORING

PetMAP™+II, diagnosis and monitoring!

- Temperature monitor using esophageal probe
- O$_2$ saturation with pleth display along with petMAP+ II SpO$_2$ model

For a comprehensive monitoring, 2 optional modules:
- ECG Module (ECG waveform and HR display)
- Mainstream capnography providing CO$_2$ numerics (EtCO$_2$, Insp CO$_2$, RtCO$_2$) and Respiration Rate from CO$_2$

Automatic cuff inflation !
During the monitoring session, the measurement process starts automatically, according to time lapse settings.

petMAP+ *II*

MULTIPARAMETER MONITORING

SM 100

A technology specially designed for veterinary use!

The VetSpecs® SM100 monitor is developed for vital signs monitoring and ECG testing in surgery and dentistry.
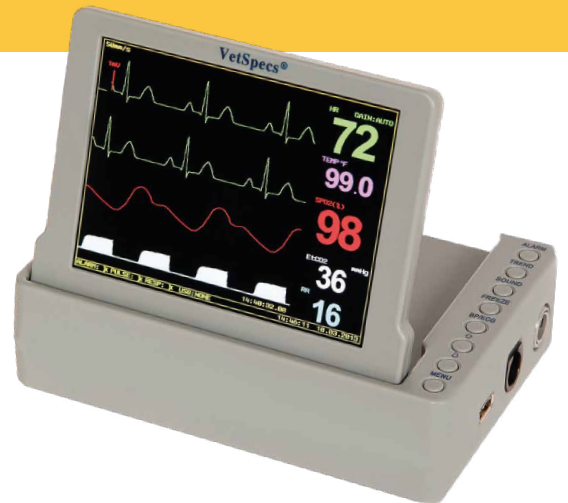

The parameters:
- Sidestream Micro-flow™ capnography
- Non-invasive blood pressure using plethysmographic method suitable for all animal sizes from 2 to 60 kg
- Pulse oxymetry with two veterinary specific SpO_2 sensors:
  - 1 lingual sensor
  - 1 leg/toe sensor suitable for use on legs and toes covered with pigmented tissue and dense fur and for use for veterinary
- ECG registered with a single esophageal probe
- Core body temperature with a single esophageal probe

PM 10B

- Sidestream Micro-flow™
- Pulse oxymetry
- ECG registered with a single esophageal probe
- Core body temperature with a single esophageal probe
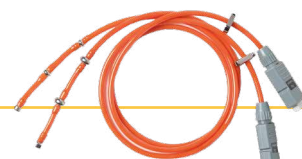

+

Our multiparameter monitors come with accessories specifically adapted to animals.

2 SpO_2 sensors:
lingual toe and leg/paw sensors

3 ECG leads
with atraumatic flat clips

2 esophageal probes
(dog and cat)

CAPNOGRAPH

Capno 5 ●━━━━

- Real-time CO_2 waveforms (capnogram)
- End-tidal CO_2 (ETCO$_2$)
- Fractional inspired CO2 (FiCO$_2$)
- Respiratory rate (RR)
- Audible and visual apnea alarms
- Delivered with table mount

Exclusive Distribution

With the very low sample flow rate of 50 ml per minute, the Capno-5 is suitable for use in a wide range of veterinary patients, including cats and dogs of all sizes!

And unlike all mainstream capnographs, which are not designed for use in dentistry and non-intubated patients, the Capno-5 can be used in all procedures for intubated or non-intubated patients.

●━ CHOOSE SIMPLY AND QUICKLY!

	T°C	Pulse oxymetry	Blood Pressure	Capno-graphy	ECG	Highlights
Capno 5				√		• Small and compact capnograph • Very low sample rate suitable for use in a wide range of animals including cats and dogs of all sizes • Long-life battery operated
PM 10 B	√	√		√	√	• 14.2 cm (5.6'') display • High sensibility sensors, cuffs and probes adapted to use on animals • Esophageal probes in 3 sizes: exotics (option), cats and dogs for Temperature and ECG • Dental ECG kit (option) • Automatic ECG tracing and monitoring recording on USB
SM 100	√	√	√	√	√	• 26.5 cm (10.5'') large display • High sensibility sensors, cuffs and probes adapted to use on animals • Esophageal probes in 3 sizes: Exotics (option), cats and dogs for temperature and ECG • Dental ECG kit (option) • Possibility to control blood pressure in diagnosis • Automatic ECG tracings and monitoring recording on USB

High Frequency Electro Surgery Units

OUR ELECTRO SURGERY DEVICES INCLUDE FULL ACCESSORY SET.
(holders, neutral plate, forceps, electrode set...)

Vet-HF B Bipolar

- Microprocessor-controlled monopolar electro surgery units
- 100 W maximum output power
- Perfect for the small animal practice

VetoSurge Bipolar Unit

- Works at 1 MHz frequency ensuring reduced tissue damage
- Strong cutting and coagulation
- Simultaneous monopolar and bipolar modes
- 110 W maximal outpout power

MMC 400S Bipolar

- 360W, digital control
- Independent regulation of the level of hemostaesis
- Simultaneous monopolar and bipolar connection
- Automatic contact plate control

RadioVet Bipolar

- Radiosurgery: a 4 MHz frequency allowing high precision surgeries with strong coagulation
- Very efficient coagulation thanks to the very latest semi-conductor high voltage gradient generator
- 200 W maximal output power

HEATED ULTRASONIC CLEANERS

Ultra-C 6

- **Ultrasonic power: 270 Watts max crest (3 transducers of 40 kHz - 180 Watts efficient)**
- **Inside dimensions Lxwxh: 300x150x150 mm**
- **Outside dimensions Lxwxh: 325x180x305 mm**
- **Volume: 6 L**
- Stainless steel tank
- Heating power: 300 Watts
- Mechanical timer adjustable from 0 to 30 min, ultrasonic automatic stopping
- Temperature setting from 0 to 80°C
- Electromechanical thermostat
- Ultrasonic independant heater circuit, NON-STOP use
- Evacuation valve
- Stainless steel basket with 10mm mesh + lid

NEW!

Ultra-C 15

- **Ultrasonic power: 540 Watts max crest (6 transducers of 40 kHz - 360 Watts efficient)**
- **Inside dimensions Lxwxh: 330x300x150 mm**
- **Outside dimensions Lxwxh: 360x330x330 mm**
- **Volume: 15 L**
- Stainless steel tank
- Heating power: 400 Watts
- Mechanical timer adjustable from 0 to 30 min, ultrasonic automatic stopping
- Temperature setting from 0 to 80°C
- Electromechanical thermostat
- Ultrasonic independant heater circuit, NON-STOP use
- Evacuation valve
- Stainless steel basket with 10mm mesh + lid

▼ **LARGE CAPACITY**

ELECTROCARDIOGRAPHS

Vet ECG-VE 100/**1lead**

An easy and suitable control of cardiac arrhythmias

- LCD single-channel display
- Printing of a single channel at a time and of 7 channels successively in automatic mode
- AC or battery powered
- Digital artifacts and interference filter
- Manual and automatic mode
- Adjustable parameters

Vet ECG-VE 300/**3 leads**

Essential for further cardiological examination

- LCD three-channels display
- Recording of 7 channels simultaneously
- Printing of 7 channels simultaneously in automatic mode
- AC or battery powered
- Digital artifacts and interference filter
- Manual and automatic mode
- Adjustable parameters

Microscopes
VetScience

Binocular Microscope

B02
Ideally designed for intensive use in veterinary practice
- Infinity achromatic plans (4x/10x/40x et 100x)
- Large field ocular 10x/20 mm
- 3W LED lamp, adjustable brightness and focus

Trinocular Microscope

T03

ideally designed for intensive use in advanced veterinary practice
- Infinity achromatic plans (4x/10x/40x et 100x)
- Large field ocular 10x/20 mm
- 3W LED lamp, adjustable brightness and focus
- Coaxial focusing knob, course focusing range is 15mm and fine focusing is graduated in increment of 1µm.
- Optional camera and tablet

Selected Products

X0.25 C-mount camera
- USB 2.0 connection
- 10 MPixel image resolution
- Software including many settings

Tablet
Android-powererd 9.7'' tablet
- Built-in a 5 MP camera
- X 0.25 C-mount
- Software including many settings

PORTABLE MULTIPARAMETER MONITORING

MonitoVet

The most compact and affordable vital signs monitors

- Mainstream Capnography (EtCO$_2$)
- Pulse oxymetry (SpO$_2$)
- Non-Invasive Blood Pressure
- Temperature

CHOOSE YOUR COMBINATION!

SpO$_2$ + Temperature **1**	EtCO$_2$ + SpO$_2$ **3**
SpO$_2$ + BP + Temperature **2**	SpO$_2$ + EtCO$_2$ + BP **4**

Oxygen concentrator

VetO$_2$$^+$ Silent (5 litres)

- Produces 0.5 to 5 l of oxygen per minute
- Equipped with a humidification flask including a pressure relief valve
- Size of a cabin suitcase (35 x 28 x 51 cm)
- Quiet: only 40 dB

+

Mano Médical exclusive support: Test quickly and easily how efficient your oxygen concentrator is!
Contact-us: +33 (0)2 96 85 86 76

Selected Products

Apnea detector

apAlert

The original!

Easy anaesthesia respiration monitor
- Visual and acoustic alarms
- Display of seconds passed between two breaths
- Alarms and sensitivity adjustment

Laryngoscope

Set of 3 straight Miller blades

- 1 x 75 mm Miller blade (n°0)
- 1 x 100 mm Miller blade (n°1)
- 1 x 150 mm Miller blade (n°2)

SCALER

D7 ultrasonic scaler

Including a 400 ml water tank and a detachable and autoclavable handpiece
- Applications: scaling, periodontal and endodotic treatments
- Optical handpiece for more convenient operation
- SATELEC compatible detachable handpiece

7 different tips for endless applications

GD1   GD4   GD5   GD6   PD1   PD3   PD4D

Vet200 Plus ultrasonic scaler

Portable and powerful Piezo-electric scaler
Perfect for veterinary use
- 5 piezo-ceramic tips
- Automatic frequency tracking
- Pressure from 0.1 to 0.5 bar
- EMS compatible detachable handpiece

Strong Micromotor and Polisher

Light, compact and handy for interventions on small animals or devitalized teeth
- Compact and light type E motor
- Regular speed from 0 to 35 000 RPM
- 1:1 contra angle included

Selected Products

STABILIZER FOR INFUSION

IV Stab

Design to prevent intravenous catheter occlusion
Set of 3 sizes (S, M and L)

VETERINARY FLUID WARMER

Vet Temp2

- Use with standards fluids, blood and TPN fluids
- Accepts standard tubing sets for small animals
- Temperature sensors allow the temperature control of the heating plate

Surgery 🗲

VACUUM UNIT

Askir

For a clean and bloodless operating field

- Portable and compact
- Suitable for medical procedures
- 1 liter autoclavable collection jar
- Flow: 30 l /minute

NEBULIZER

Designed for aerosoltherapy

- Operating air flow: 5.2 l / min
- Pressure: 1.3 bar
- Neb-rate with 4 ml solution: 0.50 ml / min

Selected Products

Selected Products

All our X-ray generators are **certified CE Medical 93/42**
*According to your country regulation, **CE Medical** or **NF74100 certifications** may be mandatory.*

PORTABLE X-RAY GENERATORS

HF 1060

- High frequency X-Ray generator
- Exposure hand switch
- Dual laser for easy focal distance setting
- Convenient handling for advanced image quality
- Supplied in a robust carrying case
- Weight: 12.9 kg

Poskom 20BT Lite

- High frequency X-Ray generator
- Internal battery or external power supply operation
- Up to 650 exposures on one charge
- Dual laser for easy focal distance setting
- Supplied in a robust aluminium carrying case
- Weight: 7.2 kg

## EQUINE FLAT PANEL
DR Imaging WIFI

- Transported in a rigid, water-proof case highly resistant to impacts
- Long-life battery
- Small size and handle for easy transportation (333 x 282 x 15 mm, 2.8 kg)
- Completely wireless

Computer not included

PRE-PURCHASE EXAMS MADE EASIER!
AUTOMATIC measurements, image labeling, rotation and calibration
WITH A SIMPLE CLICK, share images or reports via email or cloud server

✛ SOFTWARE AND ARTIFICIAL INTELLIGENCE

A whole world of possibilities to facilitate the work of equine veterinarians

- Automatic measurements
- Automatic image labeling
- Automatic hoof measurements and mark-up
- Automatic image location, calibration, cropping and rotation

- No need to predefine a worklist
- No need to return to the computer to label images
- Deep learning : Intellect module learns from experience and improves its detection capabilities

FLAT PANEL

DR Imaging

- CE Medical Silicium CSI Flat Panel
- Instantly delivered high resolution images
- Works with any X-ray generator
  2 sizes: 40 x 43 and 43 x 43 cm
- Fits easily in your cassette drawer
- Can be used wireless (option)

+

ManoVet software: a custom-made solution!
Select the right set according to your needs!

SOFTWARE

ManoVet

Computer not included

ManoVet STANDARD
designed for daily operations

- An intuitive and easy to use display
- Image quality: Image processing specifically developed for use on animals
- Possibility to adjust the image style to customer's requirements
- Possibility to save images with various post-processing parameters
- Preset anatomical parts for dogs, cats, horses and exotics
- Calibrate measurements to take into account object / panel distortion in just two clicks
- Windows or DICOM printing
- Guided measurements
- JPG images sharing on the clinic network, allowing to integrate them in the patient file on the management software

ManoVet PREMIUM
to meet special needs

- Connectivity module
- Advanced images Management
- Radiation protection(automatic dose information recording for all images and performing staff)
- Orthopaedis Module (advanced functionalities for orthopaedis)

Mano Médical Mini PACS (option)

- Get access to all images from any other location in the clinic with the full set of ManoVet functionalities!
